Proposed Classification of services for the 2025-30 Regulatory period	4

Ergon Energy Network and Energex Proposed 2025-30 Service Classification

Overview

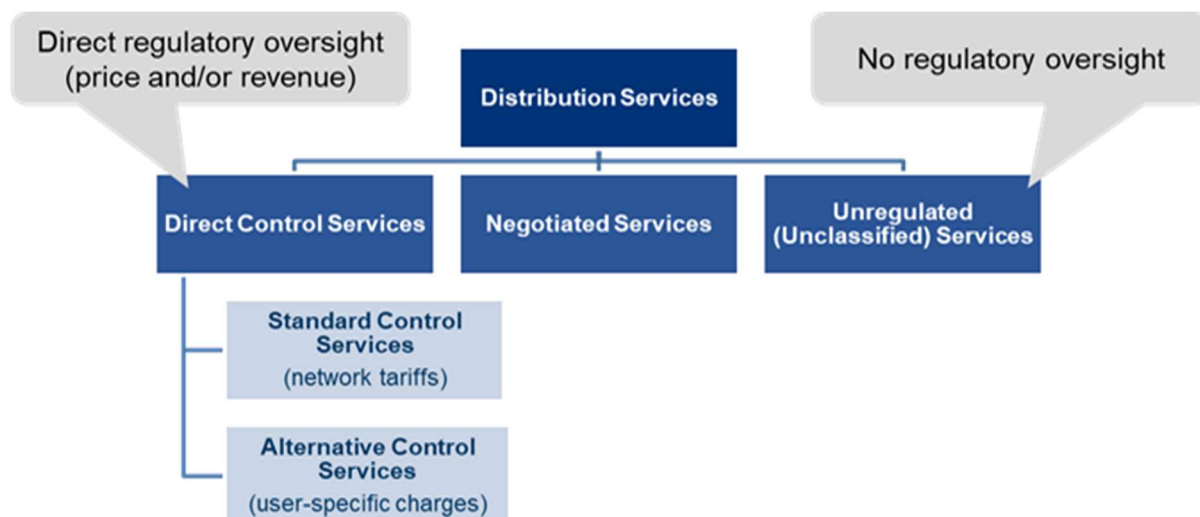

This document sets out proposed classification of services table for Ergon Energy Network and Energex for the 2025-30 regulatory period.

The classification of services is the foundation of the regulatory framework. It determines which distribution services will be regulated by the Australian Energy Regulator (AER) and how the costs of the regulated services will be recovered. Distributors can either spread the costs of providing distribution services across all customers and recover them via network tariffs or directly attribute the costs to the specific customers that benefit or request the services. Service classification also impacts distributors' ring-fencing, cost allocation and shared asset obligations.

Under the current National Electricity Rules (NER), the AER may:

- classify distribution services as direct control services. These services are subject to direct regulatory oversight by the AER via revenue or price setting. Direct control services are further classified as either standard control services (SCS) or alternative control services (ACS).
- classify distribution services as a negotiated distribution service. These services are subject to a more light-handed form of regulatory oversight via a negotiating framework.
- not classify a distribution service. These services are not subject to regulatory oversight.

The figure below summarises the classification of services process.

Ergon Energy Network and Energex Proposed 2025-30 Service Classification

Proposed Classification of services for the 2025-30 Regulatory period

The NER provide that a regulatory proposal must contain, amongst other things, a classification proposal¹ and the service classification must be as set out in the Framework and Approach Paper (F&A) unless the AER considers that a material change in circumstances justify departing from the classification as set out in the F&A paper.²

In this regard, our proposed classification of service table (provided in Appendix 1) is largely consistent with the AER's final F&A paper published on 3 July 2023 except for Type 5 and 6 or legacy metering services. Consistent with the guidance provided by the AER in the F&A, we propose to reclassify legacy metering services as SCS. The F&A maintained an ACS classification for legacy metering services but expected us to depart from this classification after the completion of the Australian Energy Market Commission's (AEMC's) review of the regulatory framework for metering services. The AER considered that the AEMC's review would constitute a material change in circumstances. We support this view.

¹ NER CI 6.8.2 (c) (3)

² NER CI 6.12.3(b)

Ergon Energy Network and Energex Proposed 2025-30 Service Classification

APPENDIX 1 2025-30 CLASSIFICATION OF SERVICES TABLE

Service Group	Further Description ³	Current Classification 2020-25	Proposed classification 2025-30
Common distribution service-use of the distribution network for the conveyance/flow of electricity (including the services relating to network integrity)			
Common distribution service	<p>The suite of activities that includes, but is not limited to, the following:</p> <ul style="list-style-type: none"> the planning, design, repair, maintenance, construction, and operation of the distribution network the relocation of assets that form part of the distribution network, but not relocations requested by a third party (including a customer) works to fix damage to the network⁴ and (including emergency recoverable works caused by a customer or third party) support for another network during an emergency event procurement and provision of network demand management activities for distribution purposes training internal staff and contractors undertaking direct control services. activities related to 'shared asset facilitation' of distributor assets⁵ emergency disconnect for safety reasons and work conducted to restore a failed component of the distribution system to an operational state upon investigating a customer outage 	Standard control	Standard control

³ The examples and activities listed in the "Further description" column are not intended to be an exhaustive list. Rather the examples provide a sufficient indication of the types of activities captured by the service.

⁴ May include the provision of temporary stand-alone power systems to restore supply.

⁵ Revenue for these services is charged to the relevant third party and is treated in accordance with the shared asset guideline. 'Shared asset facilitation' refers to administrative costs of providing the unregulated service.

Ergon Energy Network and Energex Proposed 2025-30 Service Classification

Service Group	Further Description ³	Current Classification 2020-25	Proposed classification 2025-30
	<ul style="list-style-type: none"> rectification of simple customer faults where: <ol style="list-style-type: none"> the need for rectification work is discovered in the course of the provision of distribution services the work performed is the minimum required to restore safe supply the work can be performed in less than thirty minutes and does not normally require a second visit. rectification of simple customer fault relating to a life support customer or other critical health and safety issues the distributor is able to address establishment and maintenance of national metering identifiers (NMI) in market and/or network billing systems, and other market and regulatory obligations bulk supply point metering – activities relating to monitoring the flow of electricity through the distribution network ongoing inspection of private electrical works (not part of the shared network) required under legislation for safety reasons Work related to a regulated stand-alone power system (SAPS) deployment, operation and maintenance (including fault and emergency repairs) and customer conversion activities⁶ <p>Such services do not include a service that has been separately classified, including any activity relating to that service.</p>		
Connection services – services relating to the electrical or physical connection of a customer to the network⁷			
Basic connection services	Means a connection service related to a connection (or a proposed connection) between a distribution system and a retail customer's premises (excluding a non-registered	A. Standard control	A. Standard control

⁶ Includes simple customer fault rectification on generation service of regulated SAPS.

⁷ Applies to both NER chapter 5 and 5A connections

Ergon Energy Network and Energex Proposed 2025-30 Service Classification

Service Group	Further Description ³	Current Classification 2020-25	Proposed classification 2025-30
- premises connections	<p>embedded generator's premises) in the following circumstances:</p> <p>(a) either:</p> <p>(1) the retail customer is typical of a significant class of retail customers who have sought, or are likely to seek, the service; or</p> <p>(2) the retail customer is, or proposes to become, a micro embedded generator; and</p> <p>(b) the provision of the service involves minimal or no augmentation of the distribution network; and</p> <p>(c) a model standing offer has been approved by the AER for providing that service as a basic connection service</p> <p>Premises connections are new connection assets located on the customer's premises for:</p> <p>A. small customers.⁸</p>		
Standard connection services – premises connections	<p>Means a connection service (other than a basic connection service) for a particular class (or sub-class) of connection applicant and for which a model standing offer has been approved by the AER.</p> <p>Premises connections are new connection assets located on the customer's premises for:</p> <p>A. large customers.⁹</p>	<p>A. Alternative control</p> <p>B. Standard control</p>	<p>A. Alternative control</p> <p>B. Standard control</p>

⁸ Generally, small customers are those customers who connect under the Standard Asset Customer tariff classes as per the distributor's pricing proposal, excluding real estate developments as set out in the distributor's connection policy.

⁹ Generally, large customers are those customers who connect under the Individually Calculated Customer and Connection Asset Customer tariff classes as per the distributor's pricing proposal, including real estate developments as set out in the distributor's connection policy.

Ergon Energy Network and Energex Proposed 2025-30 Service Classification

Service Group	Further Description ³	Current Classification 2020-25	Proposed classification 2025-30
	B. small customers. ¹⁰		
Standard connection services – network extension	<p>Means a connection service (other than a basic connection service) for a particular class (or sub-class) of connection applicant and for which a model standing offer has been approved by the AER.</p> <p>Network extension means an enhancement required to connect a power line or facility outside the present boundaries of the transmission or distribution network owned or operated by a network service provider to facilitate:</p> <p>A. a new or altered large customer connection¹¹, where the network extension will be dedicated to the exclusive use of the large customer at the time of installation and energisation and there is no reasonable likelihood that the network extension will be used to supply another customer or customers within the time period set out in the distributor's Connection Policy.</p> <p>B. a new or altered large customer connection¹², where the distributor considers there is a reasonable likelihood that the network extension will be used to supply another customer or customers within the time period set out in the distributor's Connection Policy (i.e., will</p>	<p>A. Alternative control</p> <p>B. Standard control</p> <p>C. Standard control</p>	<p>A. Alternative control</p> <p>B. Standard control</p> <p>C. Standard control</p>

¹⁰ Generally, small customers are those customers who connect under the Standard Asset Customer tariff classes as per the distributor's pricing proposal, excluding real estate developments as set out in the distributor's connection policy.

¹¹ Generally, large customers are those customers who connect under the Individually Calculated Customer and Connection Asset Customer tariff classes as per the distributor's pricing proposal, including real estate developments as set out in the distributor's connection policy.

¹² Generally, large customers are those customers who connect under the Individually Calculated Customer and Connection Asset Customer tariff classes as per the distributor's pricing proposal, including real estate developments as set out in the distributor's connection policy.

Ergon Energy Network and Energex Proposed 2025-30 Service Classification

Service Group	Further Description ³	Current Classification 2020-25	Proposed classification 2025-30
	form part of the shared network). C. a new or altered small customer connection. ¹³		
Standard connection services – Augmentations	<p>Standard connection service means a connection service (other than a basic connection service) for a particular class (or sub-class) of connection applicant and for which a model standing offer has been approved by the AER.</p> <p>Augmentation means any shared network enlargement/enhancement undertaken by a distributor, which is not an extension, to facilitate:</p> <p>A. a new or altered large customer connection.¹⁴</p> <p>B. a new or altered small customer connection.¹⁵</p>	<p>A. Standard control</p> <p>B. Standard control</p>	<p>A. Standard control</p> <p>B. Standard control</p>
Negotiated connection services – premises connections	<p>Means a connection service (other than a basic connection service or standard connection service) for which a DNSP provides a connection offer for a negotiated connection contract.</p> <p>Premises connections are new connection assets located on the customer's premises</p>	<p>A. Alternative control</p> <p>B. Standard control</p>	<p>A. Alternative control</p> <p>B. Standard control</p>

¹³ Generally, small customers are those customers who connect under the Standard Asset Customer tariff classes as per the distributor's pricing proposal, excluding real estate developments as set out in the distributor's connection policy.

¹⁴ Generally, large customers are those customers who connect under the Individually Calculated Customer and Connection Asset Customer tariff classes as per the distributor's pricing proposal, including real estate developments as set out in the distributor's connection policy.

¹⁵ Generally, small customers are those customers who connect under the Standard Asset Customer tariff classes as per the distributor's pricing proposal, excluding real estate developments as set out in the distributor's connection policy.

	<p>for:</p> <p>A. large customers. ¹⁶</p> <p>B. small customers. ¹⁷</p>		
Negotiated connection services – Network extensions	<p>Means a connection service (other than a basic connection service or standard connection service) for which a DNSP provides a connection offer for a negotiated connection contract.</p> <p>Means an enhancement required to connect a power line or facility outside the present boundaries of the transmission or distribution network owned or operated by a network service provider to facilitate:</p> <p>A. a new or altered large customer connection, ¹⁸ where the network extension will be dedicated to the exclusive use of the large customer at the time of installation and energisation and there is no reasonable likelihood that the network extension will be used to supply another customer or customers within the time period set out in the distributor's</p>	<p>A. Alternative control</p> <p>B. Standard control</p> <p>C. Standard control</p>	<p>A. Alternative control</p> <p>B. Standard control</p> <p>C. Standard control</p>

¹⁶ Generally, large customers are those customers who connect under the Individually Calculated Customer and Connection Asset Customer tariff classes as per the distributor's pricing proposal, including real estate developments as set out in the distributor's connection policy.

¹⁷ Generally, small customers are those customers who connect under the Standard Asset Customer tariff classes as per the distributor's pricing proposal, excluding real estate developments as set out in the distributor's connection policy.

¹⁸ Generally, large customers are those customers who connect under the Individually Calculated Customer and Connection Asset Customer tariff classes as per the distributor's pricing proposal, including real estate developments as set out in the distributor's connection policy.

Ergon Energy Network and Energex Proposed 2025-30 Service Classification

Service Group	Further Description ³	Current Classification 2020-25	Proposed classification 2025-30
	<p>Connection Policy.</p> <p>B. a new or altered large customer connection,¹⁹ where the distributor considers there is a reasonable likelihood that the network extension will be used to supply another customer or customers within the time period set out in the distributor's Connection Policy (i.e., will form part of the shared network).</p> <p>C. a new or altered small customer connection.²⁰</p>		
Negotiated connection services – Augmentations	<p>Means a connection service (other than a basic connection service or standard connection service) for which a DNSP provides a connection offer for a negotiated connection contract.</p> <p>Augmentation means any shared network enlargement/enhancement undertaken by a distributor, which is not an extension, to facilitate:</p> <p>A. a new or altered large customer connection.²¹</p> <p>B. a new or altered small customer connection.²²</p>	<p>A. Standard control</p> <p>B. Standard control</p>	<p>A. Standard control</p> <p>B. Standard control</p>

¹⁹ Generally, large customers are those customers who connect under the Individually Calculated Customer and Connection Asset Customer tariff classes as per the distributor's pricing proposal, including real estate developments as set out in the distributor's connection policy.

²⁰ Generally, small customers are those customers who connect under the Standard Asset Customer tariff classes as per the distributor's pricing proposal, excluding real estate developments as set out in the distributor's connection policy.

²¹ Generally, large customers are those customers who connect under the Individually Calculated Customer and Connection Asset Customer tariff classes as per the distributor's pricing proposal, including real estate developments as set out in the distributor's connection policy.

²² Generally, small customers are those customers who connect under the Standard Asset Customer tariff classes as per the distributor's pricing proposal, excluding real estate developments as set out in the distributor's connection policy.

Ergon Energy Network and Energex Proposed 2025-30 Service Classification

Service Group	Further Description ³	Current Classification 2020-25	Proposed classification 2025-30
Connection application and management services	<p>Works initiated by a customer or retailer which are specific to the connection point. Includes, but is not limited to:</p> <ul style="list-style-type: none"> • Connection application related services • de-energisation²³ • re-energisation • temporary connections (of a size less than the shared network augmentation threshold) as a basic connection service e.g. builder's supply, fetes, etc" • remove or reposition connection • overhead service line replacement – customer requests the existing overhead service to be replaced (e.g., as a result of a point of attachment relocation). No material change to load • protection and power quality assessment • supply enhancement (e.g., upgrade from single phase to three phase) • customer requested change requiring secondary and primary plant studies for safe operation of the network (e.g., change protection settings) • upgrade from overhead to underground service • rectification of illegal connections or damage to overhead or underground service cables • Calculation of a site specific distribution loss factor on request in respect of a generating unit up to 10 MW or a connection point for an end-user with actual or forecast load up to 40 GWh per annum capacity, as per clause 3.6.3(b1) of the NER • power factor correction 	Alternative control	Alternative control

²³ De-energisation services related to business as usual activities and de-energisation services that may relate to changing over meter types.

Ergon Energy Network and Energex Proposed 2025-30 Service Classification

Service Group	Further Description ³	Current Classification 2020-25	Proposed classification 2025-30
Enhanced connection services ²⁴	<p>Other or enhanced connection services at the request of a customer or third party include those that are:</p> <ul style="list-style-type: none"> provided with higher quality of reliability standards, or lower quality of reliability standards (where permissible) than required by the NER or any other applicable regulatory instruments. in excess of levels of service or plant ratings required by the distributor. for embedded generators, including the removal of network constraints. 	Alternative control	Alternative control
Metering services²⁵ activities relating to the measurement of electricity supplied to and from customers through the distribution system (excluding network meters)			
Type 1 to 4 metering services	Type 1 to 4 metering installations ²⁶ and supporting services are competitively available.	Unregulated	Unregulated
Type 5 and 6 meter installation and provision (prior to 1 December 2017)	Recovery of the capital cost of type 5 and 6 metering equipment (including meters with internally integrated load control devices)	Alternative control	Alternative control Standard control services

²⁴ Includes for both consumption and export services

²⁵ The Qld distributors will continue to be responsible for existing type 5 and 6 meters until they are replaced (and entitled to levy associated charges). We refer to these meters as 'legacy meters'. New meters (that will be type 1 to 4 meters) installed from 1 December 2017 are referred to as 'contestable meters'. The Qld distributors will continue to be solely responsible for the Mount Isa-Cloncurry supply network, which is not connected to the NEM.

²⁶ Includes the instrument transformer, as per the definition of a 'metering installation' in Chapter 10 of the NER.

Ergon Energy Network and Energex Proposed 2025-30 Service Classification

Service Group	Further Description ³	Current Classification 2020-25	Proposed classification 2025-30
Type 7 metering services	Administration and management of type 7 metering installations in accordance with the NER and jurisdictional requirements. Includes the processing and delivery of calculated metering data for unmetered loads, and the population and maintenance of load tables, inventory tables and on/off tables.	Standard control	Standard control
Type 5 and 6 meter maintenance, reading and data services (legacy meters)	<p>Activities include:</p> <ul style="list-style-type: none"> • Meter maintenance covers works to inspect, test, maintain and repair metering installations. • Meter reading refers to quarterly or other regular reading of a metering installation including field visits and remotely read meters. • Metering data services includes, for example: services that involve the collection, processing, storage and delivery of metering data, the provision of metering data in accordance with regulatory obligations, from remote or self-reading at difficult to access sites, and the management of relevant NMI Standing Data in accordance with the NER. 	Alternative control	Alternative control Standard control services
Auxiliary metering services (Type 5 to 7 metering installations)	<p>Activities include:</p> <ul style="list-style-type: none"> • Off-cycle meter reads for type 5 and 6 meters • Requests to test, inspect and investigate, or alter an existing type 5 or 6 metering installation • Testing and maintenance of instrument transformers for type 5 and 6 metering purposes • Type 5 to 7 non-standard metering services • Works to re-seal a type 5 or 6 meter due to customer or third party action (e.g., by having electrical work done on site) • Change distributor load control relay channel on request that is not a part of the initial load control installation, nor part of standard asset maintenance or replacement 	Alternative control	Alternative control

Ergon Energy Network and Energex Proposed 2025-30 Service Classification

Service Group	Further Description ³	Current Classification 2020-25	Proposed classification 2025-30
Type 5 and 6 meter installation and provision (Mount Isa-Cloncurry supply network only)	<p>On site installation or upgrade (at a customer's request) by Ergon Energy Network of a type 5 or 6 metering installation at a customer's premises in the Mount Isa-Cloncurry supply network.</p> <p>Load control services provided by a type 5 or 6 metering installation are grouped with metering services and classified alternative control.</p> <p>Ergon Energy Network may recover the capital cost of types 5 and 6 metering equipment (including meters with internally integrated load control devices) replaced on or after 1 December 2017, where the replacement was initiated by Ergon Energy Network.</p>	Note – Ergon only Alternative control	Note – Ergon only Alternative control
Types 5 and 6 meter maintenance, reading and data services (Mount Isa-Cloncurry Network)	<ul style="list-style-type: none"> Meter maintenance covers works to inspect, test, maintain, and repair and replace metering installations. It also includes the removal and disposal of a metering installation at customers' premises. Meter reading refers to quarterly or other regular reading of a metering installation. Metering data services are those that involve the collection, processing, storage and delivery of metering data, the provision of metering data from the previous two years, remote or self-reading at difficult to access sites, and the management of relevant NMI Standing Data in accordance with the NER. 	Note – Ergon only Alternative control	Note – Ergon only Alternative control Standard control services
Additional auxiliary metering services (Mount Isa-Cloncurry supply network only)	<p>Metering services offered by Ergon Energy Network in the Mount Isa-Cloncurry supply network for type 5 and 6 metering installations:</p> <ul style="list-style-type: none"> Provision and installation of instrument transformers for type 5 and 6 metering purposes <p>Exchange meter – customer requests exchange of their current meter (e.g., for alternative metering configuration/ consolidation of multiple meters for one meter), or customer requests exchange of their current meter for a solar photovoltaic meter</p>	Note – Ergon only Alternative control	Note – Ergon only Alternative control

Ergon Energy Network and Energex Proposed 2025-30 Service Classification

Service Group	Further Description ³	Current Classification 2020-25	Proposed classification 2025-30
Emergency supply restoration in relation to metering equipment not owned by the distributor	Customer or third party request to restore power to a customer's premises due to metering equipment not owned by the distributor	Alternative control	Alternative control
Meter recovery and disposal – type 5 and 6 (legacy meters)	<p>Activities include the removal and disposal of a type 5 or 6 metering installation:</p> <ul style="list-style-type: none"> at the request of the customer or their agent, where an existing type 5 or 6 metering installation remains installed at the premises and a replacement meter is not required. at the request of the customer or their agent, where a permanent disconnection has been requested where it has not been removed and disposed of by the incoming metering provider. 	Alternative control	Alternative control
Distributor arranged outage for purposes of replacing meter	At the request of the retailer or metering co-ordinator provide notification to affected customers and facilitate the disconnection/reconnection of customer metering installations where a retailer planned interruption cannot be conducted.	Alternative control	Alternative control
Network ancillary services – services closely related to common distribution services but for which a separate charge applies			
Access permits, oversight and facilitation	<p>Activities include:</p> <ul style="list-style-type: none"> a distributor issuing access permits or clearances to work to a person authorised to work on or near distribution systems including high and low voltage. a distributor issuing confined space entry permits and associated safe entry equipment to a person authorised to enter a confined space. a distributor providing access to switch rooms, substations and other network equipment to a non-Local Network Service Provider party who is accompanied and supervised by a distributor's staff member. May also include a distributor providing safe entry equipment (fall-arrest) to enter difficult access areas. 	Alternative control	Alternative control

Ergon Energy Network and Energex Proposed 2025-30 Service Classification

Service Group	Further Description ³	Current Classification 2020-25	Proposed classification 2025-30
	<ul style="list-style-type: none"> specialist services (which may involve design related activities and oversight/inspections of works) where the design or construction is non-standard, technically complex or environmentally sensitive and any enquiries related to distributor assets. facilitation of generator connection and operation of the network. facilitation of activities within clearances of distributor's assets, including physical and electrical isolation of assets. 		
Sale of approved materials or equipment	Includes the sale of approved materials/equipment to third parties for connection assets that are gifted back to become part of the shared distribution network.	Alternative control	Alternative control
Notices of arrangement and completion notices	<p>Examples include:</p> <ul style="list-style-type: none"> Work of an administrative nature where a local council requires evidence in writing from the distributor that all necessary arrangements have been made to supply electricity to a development. This includes but not limited to receiving and checking subdivision plans, copying subdivision plans, checking and recording easement details, site visits, assessing supply availability, liaising with developers if errors or changes are required and preparing notifications of arrangement Provision of a completion notice (other than a notice of arrangement). This applies where the real estate developer requests the distributor to provide documentation confirming progress of work. Usually associated with discharging contractual arrangements (e.g., progress payments) to meet contractual undertakings. 	Alternative control	Alternative control
Network related property services	<p>Activities include:</p> <ul style="list-style-type: none"> Network related property services such as property tenure services relating to providing advice on, or obtaining deeds of agreement, deeds of indemnity, leases, easements or other property tenure in relation to property rights associated with a connection or relocation. 	Alternative control	Alternative control

Ergon Energy Network and Energex Proposed 2025-30 Service Classification

Service Group	Further Description ³	Current Classification 2020-25	Proposed classification 2025-30
	<ul style="list-style-type: none"> Conveyancing inquiry services relating to the provision of property conveyancing information at the request of a customer. 		
Network safety services	<p>Examples include:</p> <ul style="list-style-type: none"> provision of traffic control and safety observer services by the distributor or third party where required. fitting of tiger tails and aerial markers. third party request for de-energising wires for safe approach high load escorts. 	Alternative control	Alternative control
Customer requested planned interruption	<p>Examples include:</p> <ul style="list-style-type: none"> Where the customer requests to move a distributor planned interruption and agrees to fund the additional cost of performing this distribution service outside of normal business hours. customer initiated network outage (e.g., to allow customer and/or contractor to perform maintenance on the customer's assets, work close to or for safe approach, which impacts other networks users). 	Alternative control	Alternative control
Attendance at customers' premises to perform a statutory right where access is prevented.	A follow up attendance at a customer's premises to perform a statutory right where access was prevented or declined by the customer on the initial visit. This includes the costs of arranging, and the provision of, a security escort or police escort (where the cost is passed through to the distributor).	Alternative control	Alternative control
Inspection and auditing services	<p>Activities include:</p> <ul style="list-style-type: none"> inspection and reinspection by a distributor, of gifted assets or assets that have been installed or relocated by a third party. 	Alternative control	Alternative control

Ergon Energy Network and Energex Proposed 2025-30 Service Classification

Service Group	Further Description ³	Current Classification 2020-25	Proposed classification 2025-30
	<ul style="list-style-type: none"> investigation, review and implementation of remedial actions that may lead to corrective and disciplinary action of a third party service provider due to unsafe practices or substandard workmanship. auditing of a third party service provider's work practices in the field. after hours²⁷ examination and/or testing of the consumer mains and main switchboard prior to initial energisation (upon request). after hours visual examination of an electrical installation to reconnect it to a source of electricity (upon request). re-test at a customer's installation, where the installation fails the initial test and cannot be connected. 		
Provision of training to third parties for network related access	Training services provided to third parties that result in a set of learning outcomes that are required to obtain a distribution network access authorisation specific to a distributor's network. Such learning outcomes may include those necessary to demonstrate competency in the distributor's electrical safety rules, to hold an access authority on the distributor's network and to carry out switching on the distributor's network. Examples of training might include high voltage training, protection training or working near power lines training.	Alternative control	Alternative control
Authorisation and approval of third party	<p>Activities include:</p> <ul style="list-style-type: none"> authorisation or re-authorisation of individual employees and subcontractors of 	Alternative control	Alternative control

²⁷ We note that this "after hours" reference is included because it specifically relates to section 219 and 220 of the Electrical Safety Regulation 2013 (Qld)

Ergon Energy Network and Energex Proposed 2025-30 Service Classification

Service Group	Further Description ³	Current Classification 2020-25	Proposed classification 2025-30
service providers' design, work and materials	<p>third party service providers and additional authorisations at the request of the third party service providers (excludes training services).</p> <ul style="list-style-type: none"> • acceptance of third party designs and works. • assessing an application from a third party to consider approval of alternative material and equipment items that are not specified in the distributor's approved materials list. 		
Security lights (legacy)	Operation and maintenance of equipment mounted on a-distribution equipment used for security services, e.g., nightwatchman lights installed before 30 June 2025	Alternative control	Alternative control
Customer initiated or triggered network asset relocations/re-arrangements	Relocation of assets that form part of the distribution network in circumstances where the relocation was initiated by a third party (including a customer) or triggered by a customer's non-compliance with network safety or security standards (such as network encroachments)	Alternative control	Alternative control
Customer requested provision of electricity network data	Data requests by customers or third parties including requests for the provision of electricity network data or consumption data outside of legislative obligations.	Alternative control	Alternative control
Third party funded network alterations or other improvements	Alterations or other improvements to the shared distribution network to enable third party infrastructure (e.g., NBN Co telecommunications assets) to be installed on the shared distribution network. This does not relate to upstream distribution network augmentation.	Alternative control	Alternative control
Public lighting – lighting services provided in connection with a distribution network			
Public lighting	Includes the provision, construction and maintenance of public lighting and emerging public lighting technology.	Alternative control	Alternative control
Unregulated distribution services – (non-exhaustive list)			

Ergon Energy Network and Energex Proposed 2025-30 Service Classification

Service Group	Further Description ³	Current Classification 2020-25	Proposed classification 2025-30
Distribution asset rental	Rental of distribution assets to third parties (e.g., office space rental, pole and duct rental for hanging telecommunication wires etc.).	Unregulated	Unregulated
Contestable metering support roles	Includes metering coordinator, (except where the distributor is the initial metering coordinator) metering data provider and metering provider for meters installed or replaced after 1 December 2017	Unregulated	Unregulated
Provision of training to third parties for non-network related access	Training programs provided to third parties which are not related to network access	Unregulated	Unregulated
Type 5 and 6 meter data management to other electricity distributors	The provision of type 5 and 6 meter data management to other electricity distributors.	Unregulated	Unregulated
Distribution services provided in unregulated isolated networks	Ownership and operation of isolated supply networks, other than the Mount Isa-Cloncurry supply network (Ergon Energy Network).	Note – Ergon only Unregulated	Note – Ergon Only Unregulated
Hayman Island undersea cable		Note – Ergon only Unregulated	Note – Ergon only Unregulated
Inspection of private network infrastructure	Inspection of privately owned low voltage or high voltage network infrastructure (i.e., privately owned distribution infrastructure before the meter).	Unregulated	Unregulated
