

Good morning/afternoon.

I have recently been made aware of humelink and have a few concerns.

As i am an electricity consumer in the City of Penrith i don't want to see my energy bills to go up which was indicated by table 13 of the cost to consumers and as such I expect the regulator to protect me and my fellow neighbours from any unnecessary or premature bill increases.

I have also heard of stories of Preliminary Acquisition Notice being sent out to whom the people of such even though not in my local area are being forced via COMPULSORY ACQUISITION to give up their land. This is not the Australian way and is yet another way for the government to put businesses over the people.

As such i ask for you not to approve Humelink.

Thankyou

Kind regards Colin T Cachia
