Subject: RE: AER 2024 Annual Benchmarking Report for transmission - draft AER report for consultation

Hi Arwin

Thanks for your reminder email. I appreciate the fact sheet I think that is a useful initiative.

I am not sure if the AER would consider next year after you first send out the draft report inviting Network business to an online call for the AER to walk through the report and the data inputs, I think it would be very useful. Perhaps I have overlooked it but I think it would be useful in your data file to reference back to the EB RIN data cells. I am sure I saw a file for the RIO data use but is there an equivalent for the RIN? I understand 2023-24 is the last year.

If it is easier to discuss, please call my mobile on [REDACTED].

Regards
Louise.
