

Addressing increased customer demand requirements in the Macquarie Park area

CONTINGENT PROJECT APPLICATION

Appendix 2 – Statement to the AER – compliance with clause 5.17.4(z)

07 February 2025

Appendix 2 - Statement to the AER

Ausgrid makes the below statement for the purposes of complying with clause 5.17.4(z) of the National Electricity Rules.

Ausgrid confirms that:

- there have not been any material changes in circumstances (MCC) that would warrant a re-application of the Regulatory Investment Test for Distribution (RIT-D) for addressing increased customer demand requirements in the Macquarie Park area, noting that less than six months have passed since completion of the corresponding RIT-D (10 November 2024).
- no additional actions have been imposed by the AER; and
- this statement was published at the same time as the CPA was submitted to the AER.
