PAL RIN 31 - Embedded generator payments TUOS- Jan2025 – Confidential [entire document]	Names and payments to embedded generators	Opex	Personal information	Identification of customers/businesses by name and the payments they have received from the business	The information directly identifies customers/businesses and payments by year which raises privacy considerations	Provision of this information does not provide any public benefit and may breach privacy obligations

**Confidentiality category** 

A NSP must categorise the confidential information into one of the following confidentiality categories:

- Information affecting the security of the network information which, if made public, may jeopardise security of the network or a NSP's ability to effectively plan and operate its network.
- *Market sensitive cost inputs* information such as supplier prices, internal labour costs, and information which would affect the NSP's ability to obtain competitive prices in future infrastructure transactions, such as tender processes.
- *Market intelligence* information which may provide an advantage to a NSP's competitors for non-regulated or contestable activities.
- Strategic information information such as the acquisition of land and easements, where the release of this information might adversely impact the NSP's ability to negotiate a fair market price for these items.
- *Personal information* information about an individual or customer whose identity is apparent or can reasonably be ascertained from the information which raises privacy considerations.
- *Other* information which the NSP claims is confidential but does not fit into one of the above categories.

## 2. **Proportion of confidential material**
