I have been unable to find the means to respond with comments to the Australian Energy Regulator's applications for revenue increases - regarding Qld Tariffs

<https://www.aer.gov.au/news/articles>

Therefore, my comments are:

I object to the lies & deceit of energy companies & the Regulator as they try to sneakily force their CONTrolling Smart Meters on consumers Against Our Will - With No Consent - enabling them to make excuses to increase revenue as a direct consequence of unreliable, intermittent, unaffordable, insecure, inefficient, CCP reliant energy sources THAT DON'T WORK MOST OF THE TIME & cause energy deprivation & energy poverty.

Ripping off electricity consumers through their Reckless RenewaBULL Swindle, unjustly depriving us of our own far superior Coal & Nuclear Power & stealing from our own self-funded 'consumer energy resources' is criminal & must all be investigated in a ROYAL COMMISSION.
