

## United Energy sub-threshold tariff notification: Flexible TUOS Pass-through tariff

Distributor	United Energy
Total cumulative revenue of all sub-threshold tariffs (\$ and % AAR)	\$0.48m which is 0.1% of AAR
Confirmation for publication	We confirm that this document contains no commercial or private information, and we provide permission for the AER to publish this notification on the AER website.

Name of trial	Flexible TUOS pass-through
Objectives of trial	Provide any new connections in the 2025-26 regulatory year which would be eligible for United Energy's proposed Flexible TUOS-pass flexible tariff over the 2026-31 regulatory period to access the proposed tariff in the current regulatory period.
Retailer engagement	Retailer forum and United Energy's proposed 2026-31 TSS.
Consumer engagement	Engagement with a prospective eligible customer and United Energy's proposed 2026-31 TSS.
Expected consumer and/or retailer response	A reduction in demand and increase in generation at times when monthly peak demand is likely to occur at the relevant terminal station.
Proposed tariff (structure and pricing)	Pass-through of incremental TUOS charges including credit for avoided TUOS due to locational demand charges. An individually calculated DUOS capacity charge.
Links to TSS strategy and Export tariff transition strategy (if applicable)	The proposed trial tariff replicates the Flexible TUOS pass-through tariff in United Energy's proposed 2026-31 TSS.
Forecast revenue (\$ and % AAR)	<\$100,000 and <0.1% of AAR
Trial start date	1 July 2025
Duration of trial	One regulatory year
Potential changes and triggers	Dependent on stakeholder feedback and AER draft decision on United Energy's proposed 2026-31 TSS.
Notification date	25 February 2025
