

# Environment

## Policy Statement

*We want to operate our business in a clean, green and sustainable way to ensure current and future generations are able to enjoy the benefits of a healthy, natural environment.*

Aurora Energy's environmental principles:

- we will be leaders in the responsible management of environmental impacts associated with our business activities
- we will have open, effective communication to keep our customers and the Tasmanian community informed on matters of environmental interest and concern
- we will provide our people with the necessary training and environmental know-how to fulfill their environmental responsibilities

We will achieve these principles by:

- building an assessment of environmental impacts into our business decisions
- encouraging our customers to use our products wisely and efficiently and setting an example with sustainable energy practices
- conducting regular environmental performance reviews and annual environmental performance reports
- ensuring as a minimum standard that our activities comply with relevant environmental legislation and other relevant regulatory requirements
- following specific environmental policies, standards and procedures as detailed by our AuroraGreen environmental management system
- ensuring continual improvement in environmental management practices, and integrating environmental considerations into our planning and operations

Clean, green and sustainable
