Dear Alice

**Re: Part 24 and Part 25 Full exemption – E04 Pipeline**

Thank you for your application of 26 February 2019 seeking exemption of the E04 pipeline from new obligations under Parts 24 and 25 of the National Gas Rules (NGR). On 22 November 2018, Parts 24 and 25 came into effect.

The AER has determined to grant this full exemption on the basis that the E04 Pipeline has been granted a Part 23 Category 1 and Category 2 exemption and does not provide third party access. This takes account that the same criteria supporting a Category 1 Part 23 exemption equally apply for a full exemption under Part 24 of the NGR.

The Part 24 exemption will expire on 28 February 2024, unless the Part 23 exemption continues to apply to the E04 Pipeline, including any period during which the AER is considering whether to extend or reapply such an exemption, in which case the exemption will continue in force until the Part 23 exemption ceases.

As required by Rule 611(10), please notify the AER if circumstances change such that the E04 Pipeline no longer qualifies for this full exemption.

Rule 611(9) requires the AER to maintain a public register for Part 24 exemptions. The details will be the same as those published on the Part 23 Register.

If you wish to discuss the content of this letter or have any questions, please contact Jeremy Llewellyn on (07) 3835 4610.

Yours sincerely
