Purpose

The purpose of this document is to define Directlink's Negotiating Framework for the provision of Negotiated Transmission Services to Service Applicants ("Service Applicants") as required under the *National Electricity Rules* ("NER").

Rule framework

Clause 6A.9.5 of the NER provides that:

- Transmission Network Service Providers ("TNSPs") must prepare a document setting out the procedure to be followed during negotiations between that provider and any person who wishes to receive a Negotiated Transmission Service from the provider, as to the terms and conditions of access for the provision of the service;
- the negotiating framework must comply with and be consistent with the applicable requirements of a transmission determination applying to the provider; and
- the negotiating framework must comply with and be consistent with the applicable requirements of clause 6A.9.5(c), which sets out the minimum requirements for a negotiating framework

This document does not apply to Prescribed or Non-Regulated Transmission Services.

Directlink is registered with the Australian Energy Market Operator as a Transmission Network Service Provider.

Negotiating Framework

This document is prepared to fulfil Directlink's obligations under clause 6A.9.5 of the NER to establish a negotiating framework.

This document applies to Directlink and any Service Applicant who applies to receive a Negotiated Transmission Service.

As defined in the *National Electricity Rules*¹ a Negotiated Transmission Service is any of the following Services:

- (a) a *shared transmission service* that:
 - (1) exceeds the *network* performance requirements (whether as to quality or quantity) (if any) as that *shared transmission service* is required to meet under any *jurisdictional electricity legislation*; or
 - (2) except to the extent that the network performance requirements which that *shared transmission service* is required to meet are

¹ *National Electricity Rules*, version 59, 31 October 2013, Chapter 10

prescribed under any *jurisdictional electricity legislation*, exceeds or does not meet the *network* performance requirements (whether as to quality or quantity) as are set out in schedule 5.1a or 5.1;

- (b) *connection services* that are provided to serve a *Transmission Network User* or group of *Transmission Network Users*, at a single *transmission network connection point*, other than *connection services* that are provided by one *Network Service Provider* to another *Network Service Provider* to connect their networks where neither of the *Network Service Providers* is a *Market Network Service Provider*; or
- (c) *use of system services* provided to a *Transmission Network User* and referred to in rule 5.4A(f)(3) in relation to *augmentations* or *extensions* required to be undertaken on a *transmission network* as described in rule 5.4A;

but does not include an *above-standard system shared transmission service* or a *market network service*.

Italicised terms are defined in the *National Electricity Rules*.

Scope and Context

The NER² provides that services that are not “negotiated” or not “prescribed” as defined in the Rules are expressly not subject to regulation under Chapter 6A. These services are therefore not subject to this Negotiating Framework.

This Negotiating Framework applies only to the provision of Negotiated Transmission Services.

Legislation and Standards

The following legislation and standards are applicable:

National Electricity Rules - Chapter 6A, 5 and 4

Competition and Consumer Act 2010
