

Couran cove Resort

Regarding draft decision on application for an individual exemption.

We are the owners of Lot 105 at above and are aware the electricity operator has presented an operating budget of over 1 million dollars to the Community Body Corp for the period to March 2021 to which all owners will be contributing.

We are concerned that there may be further fee charges proposed by the operator approved by the AER and as owners we will have already paid till at least March 2021.

As the supply of electricity is unreliable at best we believe any further increase in fees is totally unjustified.

Yours Sincerely

Greg Linton
