#### 1. Overall Compliance Statement

Throughout the 2020 regulatory year, Jemena Electricity Networks (Vic) Ltd. (**JEN**) has maintained the compliance controls as described in Section 2 and Appendix A of this Report.

JEN considers it has complied with the Australian Energy Regulators (**AER**) Ring-fencing Guideline (**Guideline**) obligations for the 2020 regulatory year with the exception of breaches reported to the AER as set out in Section 2.4.

#### 2. Reporting details

#### 2.1 Maintaining and establishing compliance

Clause 6.1 of the Guideline obligates Distribution Network Service Providers (**DNSPs**) to maintain and establish appropriate internal procedures to ensure they comply with obligations under the Guideline.

JEN's operations are subject to a wide range of legal, regulatory and licence requirements. As such, our business has existing procedures and systems to support JEN to identify, assess, adhere and monitor compliance to its many obligations. Our procedures and systems have been designed in line with AS ISO 19600:2015 Compliance Management Systems. In terms of the Guideline, JEN has incorporated those regulatory requirements into existing policies, procedures and systems where practical. Where necessary, new procedures or controls have been developed and implemented.

A key existing procedure and system paramount in maintaining our compliance is the integration of Guideline obligations within Jemena's Compliance and Risk System (**JCARS**). This system houses detail about the obligations, such as the description, instrument reference, its risk rating (as per Jemena's risk matrix), obligation review frequency (as per risk rating) and the responsible person within the business for certifying compliance. Certification requires the responsible person to verify that JEN is compliant with the relevant obligation and continues to be equipped to be compliant in the future.

Given the importance JEN places on being compliant with its legislative and regulatory requirements, the JCARS procedure and system is established in a manner that distributes reminders to the responsible persons to review their compliance obligations, in advance of a specified due date. If not completed by the due date, the executive leader who holds ultimate accountability for the relevant obligation, will be notified of the non-response (which equates to non-adherence of the obligation).

This escalation path is critical for Jemena and its staff to reinforce the importance of maintaining, monitoring and acknowledging its compliance with obligations. The system and process assists in maintaining awareness and knowledge of the obligations as it creates a trigger to periodically review, without prompt of an obvious event or trigger such as a complaint, system failure or organisational change which would otherwise suggest or indicate a potential non-compliance risk.

This procedure and process is a critical mechanism for JEN to produce and validate its compliance with the Guideline and to subsequently document this Report.

#### 2.2 Reporting period

Clause 6.2.2 of the Guideline requires DNSPs to submit a compliance report to the AER annually, within four months of the end of each regulatory year.

JEN has complied with this requirement by submitting this Report, based on data from the regulatory year of 1 January 2020 to 31 December 2020, by 30 April 2021. Refer to section 1.2 for a statement on JEN's overall compliance.

JEN has implemented processes that will require responsible persons within Jemena to complete their compliance responses by 30 November in the reporting year, to allow adequate time for this report to be prepared, validated and assessed by an independent assessor during March and April. This will enable JEN to prepare and submit its Report, with due care and skill, in accordance with the Guideline.

To complete their compliance responses, the responsible persons need to certify:

- that they are currently compliant (and have complied since they last reported) with the requirements of the obligation
- there are effective compliance measures in place to ensure future compliance.

#### 2.3 Measures to ensure compliance

Clause 6.2.1(b)(i) of the Guideline requires that the annual compliance report must identify and describe, in respect of the regulatory year, the measures the DNSP has taken to ensure compliance with its obligations under the Guideline.

The SGSP (Australia) Assets Pty Ltd (**SGSPAA**) group has an internal Compliance Policy which affirms the commitment of the group's businesses, including JEN, to compliance with applicable legal and regulatory obligations. This is achieved through structures and management systems supporting group companies to manage and monitor regulatory requirements, create and maintain a compliance culture, and ensure all officers and staff within the SGSPAA group, including contractors, are aware of these obligations and act accordingly.

In 2017, a dedicated project team in conjunction with relevant business owners implemented the required process and system changes to comply with the Guideline.

During the course of the implementation project, an independent assessor was engaged to perform a gap analysis ("gap analysis review") to consider whether the controls identified and developed to achieve compliance would reasonably achieve compliance once implemented and operating effectively. Findings raised by the independent assessor during the gap analysis review were addressed by JEN in November 2017.

This review further supported and reflected JEN's commitment to compliance, and JEN was accordingly able to demonstrate full compliance with the Guideline as at 31 December 2017.

As part of the implementation project, Guideline compliance controls were also embedded in JCARS. Through this system, Guideline obligations have been assigned to responsible persons, and all responsible persons are required to complete a compliance review and certification relating to their assigned obligation(s) within specified timeframes.

**Appendix A** sets out the controls JEN has in place and how these are effective in demonstrating JEN's compliance to its electricity ring-fencing obligations.

As the Guideline's obligations are now embedded in the company-wide compliance program, they are reviewed periodically (via responsible persons and via assurance activities carried out by Jemena compliance functions), as is the case for all obligations in the JCARS system, to ensure continued monitoring and compliance. Obligations in JCARS are assessed by the compliance team to ensure continued accuracy and relevance and where appropriate updated or reassigned.

As a further control, Jemena's Leadership Team (Managing Director and Executive General Managers) receive quarterly reports of compliance activities (which includes any reportable breaches), and a status update on compliance with obligations is provided to the Audit and Compliance Committee of the Board of JEN's holding company, SGSPAA (which in turn reports to the full SGSPAA Board annually). As such, non-compliances are reported to the highest level of management and addressed accordingly, including in a Board context.

In 2020, JEN has maintained these compliance measures and utilised learnings from breach investigations and observations from the independent review of our 2019 Ring-fencing Annual Compliance Report to further enhance our compliance controls. The 2020 compliance activities are set out in **Appendix B**.

#### 2.4 Reporting details

Clause 6.2.1(b)ii of the Guideline requires DNSPs to report any breaches of the Guideline by the DNSP, or which otherwise relate to the DNSP.

During the year, JEN reported 3 breaches to the AER as outlined in Table 2-1.

Table 2-1: Breaches reported during 2020 regulatory year

| Obligation                      | Materiality as assessed by AER | Date reported | Further details  |
|---------------------------------|--------------------------------|---------------|--|
| Cross promotion (cl. 4.2.3)     | Not material                   | 28/02/2020    | An employee forwarded an internal email relating to a promotion being run by a RESP of JEN to an external party from their Jemena email account. Breach identified through internal controls.  |
| Physical separation (cl. 4.2.1) | Not material                   | 05/03/2020    | A JEN employee who is required to work within a secure location worked part time for three weeks on a project that was outside the secured area. Breach identified through internal controls.  |
| Physical separation (cl. 4.2.1) | Not material                   | 03/04/2020    | A new employee of a RESP of JEN was assigned inappropriate access to a JEN secure location for 1 day. The employee's access pass was remediated in May but access to the building was prevented from the day the breach was identified due to Covid workplace restrictions. Breach identified through internal controls. |

#### 2.5 Other services provided by JEN

Clause 6.2.1(b)iii of the Guideline requires DNSPs to report all other services provided by the DNSP in accordance with clause 3.1 of the Guideline.

During the 2020 regulatory year, JEN did not provide any other services.

#### 2.6 Transaction report

Section 6.2.1(b)iv requires DNSPs to report the purpose of all transactions between the DNSP and its affiliated entities.

JEN primarily transacts with Jemena Asset Management Pty Ltd (**JAM**). JAM is part of the overarching Jemena group used for procuring and contracting assets and services for Jemena's distribution networks businesses including JEN. Transactions between JAM and JEN are captured within projects using Work Breakdown Structures in Jemena's accounting and finance Enterprise Resourcing Platform (**ERP**) system.

Throughout 2020, JEN also had a limited number of transactions with the following affiliated entities: SGSPAA, Jemena Limited, Jemena Gas Networks (NSW) Ltd and ZNX (2) Pty Ltd.

Transactions are categorised within Jemena's systems by cost types as either: Labour; Material; Contractor; Maintenance and Transmission; Administration; Fleet; Network Overheads; Corporate Overheads; Dividend Payments; or Other.

Further costing details are summarised in **Appendix C**.

#### 3. Independent assessment of compliance

Clause 6.2.1(c) of the Guideline requires DNSPs to ensure the annual compliance report must be accompanied by an assessment of compliance by a suitably qualified independent authority.

JEN engaged the services of KPMG to undertake a reasonable assurance review of JEN's compliance against the Guideline requirements. KPMG's audit report is provided at **Appendix D** to this Report.

| 14 | Procurement<br>Policy                                  | What it is: The policy provides a framework to efficiently and effectively procure goods and services; provide guidance on roles and responsibilities of employees undertaking procurement activities; and detail the core principles that underpin those procurement activities.  How it demonstrates and supports Jemena's compliance with its obligations: In terms of Ring-fencing, this policy puts in place procedures to procure goods and services.   |                  |                      |                 | <b>~</b>              |                        |               |                                 |                                | <b>~</b>    | <b>✓</b>                    |          |                          |
| 15 | Accountability<br>Model and<br>End to End<br>Processes | What it is: The Accountability Model is a tool related to Jemena's Enterprise Process Model (EPM). It provides a single source of truth for accountabilities across the business.  Jemena's Enterprise Process Model (EPM) documents Jemena's 4 core End to End processes; (Construction process, Maintenance process, Fault & Emergency process and Customer, Metering & Billing process).  How it demonstrates and supports compliance with obligations: In terms of Electricity Ring-fencing, it documents obligations in terms of staff/employee responsibilities (for example, of relevance to staff sharing). |                  |                      |                 |                       |                        | <b>✓</b>      |                                 |                                |             |                             |          |                          |
| 16 | Waiver<br>Register                                     | What it is: The Waiver Register published on Jemena's website (click here) outlines all approved waivers of the Guideline.  |                  |                      |                 |                       |                        |               |                                 |                                |             |                             | <b>~</b> |                          |

|    |   | What it is: A checklist for determining whether information is suitable to be published on the Jemena website or on the intranet.   |                  |                      |                 |                       |                        |               |                              |                                |             |                             |         |                          |
| 20 | Checklist for<br>publishing<br>content on<br>internet and<br>intranet | How it demonstrates and supports compliance with obligations: This demonstrates establishment of, and embedding, procedural information to support information protections and cross promoting obligations. In establishing these checklists, both Jemena's website and intranet site were reviewed to ensure compliance.   |                  |                      |                 |                       |                        |               | <b>~</b>                     |                                | <b>~</b>    |                             |         |                          |
| 21 | Brand<br>Separation   | What it is: The Ovida brand has been established as the brand of Jemena's RESP.  Review of the external website has been conducted to ensure that Ovida is not promoted as part of the Jemena brand (which is associated with the delivery of direct control services). In addition, staff working in contestable electricity services are separated from JEN dedicated staff, and required to contact and communicate with customers via 'Ovida' branded emails. This is reinforced in the onboarding checklist.  How it demonstrates and supports compliance with obligations: This |                  |                      |                 |                       |                        |               | <b>✓</b>                     |                                |             |                             |         |                          |

|    |                                 |  | AER (            | Guideli              | ne Oblig        | ation Cla             | use Referen         | се            |                                 |                                |             |                             |         |                          |

| 22 | Compliance<br>Reporting         | What it is: A compliance reporting process has been established, implemented and documented to facilitate the compilation, assessment and sending of this report to AER each year in line with the Guideline's requirements.  The applicable Guideline obligations are logged in JCARS (obligation register), with the JCARS system periodically alerting responsible persons to assess and confirm compliance.  This process is part of the annual certification process which also enables staff to receive assurance they understand and are appropriately managing their regulatory obligations.  In addition, responsible persons are to log and treat breaches in JCARS in line with the Jemena breach reporting process.  How it demonstrates and supports compliance with obligations: This demonstrates establishment of, and embedding, procedural information to support this business in |                  |                      |                 |                       |                     |               |                                 |                                |             |                             |         | •                        |

|              | notification to the Regulatory Compliance Manager of any organisational changes that have occurred in the previous 4 months, or which are planned in the upcoming 4 months.   |                  |                      |                 |                       |                        |               |                                 |                                |             |                             |     |                         |
|              | How it demonstrates and supports compliance with obligations: The review assists in ensuring the Staff Register is able to be updated and published in a timely manner in addition to providing sufficient lead time to ensure compliance can be maintained through larger organisational restructures. |                  |                      |                 |                       |                        |               |                                 |                                |             |                             |     |                         |

## **Appendix B 2020 compliance initiatives**

Page intentionally blank

The following table sets out compliance improvement activities for the regulatory year.

Table Error! No text of specified style in document.—1: Compliance improvement activities initiated during the 2020 regulatory year

| Obligation | Improvement Activity   | Status as at 3° December 202 |  |  |  |
|------------|--|------------------------------|--|--|--|
| All        | Training  A consistent theme identified when assessing the root causes of breaches was the ability for staff to translate how a ring-fencing situation materialises in their day to day work. Accordingly our 2020 training approach focussed on utilising our prior breaches as relatable guidance to staff to ensure compliance was maintained.  The 2020 training was issued to all Jemena staff and also saw the inclusion of Zinfra | Complete                     |  |  |  |
|            | staff within the Power Services and Projects and Construction teams, (who complete work for JEN). The training scope excluded Zinfra staff who were sufficiently removed from working on the JEN, for example, the Gas Services team or electricity teams whose work is conducted under contract for other distribution businesses.  |                              |  |  |  |
|            | In July 2020, a series of training videos was released to enable Jemena and selected Zinfra staff to complete refresher training through the latter half of 2020, with three modules each tailored for the targeted audience:  |                              |  |  |  |
|            | <ul> <li>The general awareness video, covering the Guidelines key obligations was<br/>issued to 1,460 staff and completed by 1,258. In part, the completion rate was<br/>impacted by the pandemic which prevented field team members from completing<br/>their training during work group meetings as planned.</li> </ul>  |                              |  |  |  |
|            | Tailored RESP and JEN dedicated modules were completed by relevant RESP and JEN staff.   |                              |  |  |  |
|            | During 2020, the Regulatory Compliance team provided a range of advice and proactive face to face interactions to enhance the businesses understanding and awareness of ring-fencing matters. Some examples include:   |                              |  |  |  |
|            | <ul> <li>RESP personnel—sharing the background and learnings from the seven<br/>breaches identified in 2019 and 2020.</li> </ul>   |                              |  |  |  |
|            | <ul> <li>Affiliate personnel within the Projects and Construction area—providing further<br/>explanation of general obligations under the Guideline.</li> </ul>  |                              |  |  |  |
|            | Marketing personnel—providing guidance on branding and cross promotion.  |                              |  |  |  |
|            | <ul> <li>Asset Management personnel—providing advice with regard to interactions with<br/>RESP personnel.</li> </ul>   |                              |  |  |  |
|            | RESP personnel—branding advice in non NEM jurisdictions.   |                              |  |  |  |
| nformation | ECMS access review   | Complete                     |  |  |  |
| protection | In line with auditors' findings to review detective control opportunities, Jemena implemented a schedule for reviewing Ovida representatives access to a key repository of JEN customer and network information (Jemena's Enterprise Content Management System (ECMS)).  |                              |  |  |  |
|            | To confirm and ensure no RESP personnel have access to the ring-fenced area of the ECMS, a review is completed by the Regulatory Compliance Manager no less frequently than bi-annually. The review involves obtaining an access permissions report from the Content Management team incorporating all RESP personnel.   |                              |  |  |  |
|            | During 2020, reviews were conducted in April and August which confirmed that Ovida representatives did not have access to the section of ECMS used by our Electricity Distribution functional group which supports JEN.  |                              |  |  |  |

| Obligation             | Improvement Activity  | Status as at 31<br>December 2020 |
|------------------------|---|----------------------------------|
| Physical<br>Separation | Facilities access review  In line with auditors' findings to review detective control opportunities, compounded by a further facilities access breach in early 2020, Jemena implemented a schedule for reviewing Ovida representative access to JEN's secure locations, (Level 15 Collins Street and all Victorian depots).   | Complete                         |
|                        | To confirm and ensure no RESP personnel have access to the secure areas, a review is completed by the Regulatory Compliance Manager no less frequently than biannually. The review involves obtaining confirmation from the Facilities Management team that the correct access restrictions have been applied to RESP personnel.  |                                  |
|                        | During 2020, the first review was completed in May where it was identified that the access pass for the breach reported in April had not been remediated correctly within the security system. However due to restrictions applied relating to attendance at the workplace as a result of the pandemic, correcting the access on the pass in May did not extend the severity of the breach. The second review was conducted in September which confirmed that Ovida representatives did not have access to any of the secure areas used by our Electricity Distribution functional group. |                                  |
| All                    | Zinfra status as an affiliate   | Complete                         |
|                        | Shortly after commencement of the Guideline, JEN requested that Zinfra (an affiliate) advise JEN should it commence the provision of contestable electricity services itself, or provide services to support the provision of contestable electricity services.   |                                  |
|                        | To confirm and ensure Zinfra has not commenced bidding for opportunities to provide contestable services, reviews of proposals considered by the Zinfra Commercial Review Committee ( <b>CRC</b> ) were completed by the Regulatory Compliance Manager to validate that none of the proposals relate to the provision of contestable electricity services.  |                                  |
|                        | During the first quarter of 2020, the Group Network Pricing and Compliance Manager attended some CRC committee meetings and separately undertook reviews of proposals to maintain oversight from a ring-fencing perspective, however as all opportunities reviewed were identified as relating to Transmission or Distribution work, this process was modified to assess a retrospective sample of CRC proposals no less frequently than bi-annually.   |                                  |
|                        | The first sample review conducted in September 2020 confirmed the sample of proposals for contracts did not identify any contracts that involve the provision of contestable electricity services.  |                                  |
| All                    | JGN status as an affiliate  | Complete                         |
|                        | In July 2020, Jemena Gas Networks ( <b>JGN</b> ) commenced consultations with the AER regarding the potential need for a waiver to progress JGN's Western Sydney Green Gas Trial. The AER considered the scope of the trial and were of the view that a waiver would not be required, but requested further consultation should the scope change.   |                                  |
|                        | To ensure the trial remains in line with what was presented to the AER, an annual review of the trial is conducted by the Project Manager and Regulatory Compliance Manager. The review requirement was entered into Jemena's compliance management system with the first instance diarised to occur in July 2021.  |                                  |

| Obligation                       | Improvement Activity   | Status as at 31<br>December 2020                               |
|----------------------------------|--|--|
| Physical                         | Physical and IT access control framework   | In-flight.   |
| separation<br>and<br>information | In November 2019 JEN initiated a wide-ranging review of its ring-fencing compliance control framework particularly to identify options to replace manual controls with automated solutions.  | Solution implemented February 2021.                            |
| protection                       | A solution was identified and business case approved in August 2020. The solution involved assigning a ring-fencing classification to all SGSPAA positions and utilising identification management software to automatically create tasks for our Digital, Content Management and Facilities teams whenever a change to a position is detected.  |  |
|                                  | Hypercare measures introduced as part of the 2019 review remained in place through 2020 that require the Regulatory Compliance Team to review and approve all IT system requests made by employees that are tagged by IT as holding RESP roles. The Group Network Pricing & Compliance Manager also reviews and approves all internal staff transfers between Jemena, Zinfra and Ovida.  |  |
|                                  | The hypercare measures for staff transfers were made more robust in May 2020 as a result of Jemena's HR Services team implementing an online form that workflows to the compliance team for ring fencing assessments and approval, generates tasks to all relevant IT teams to facilitate the IT migration and also generate email notifications to all relevant parties including the previous and receiving People Leaders and HR business partners                    |  |
| All                              | Compliance manual  | In-flight.   |
|                                  | In May 2020, JEN updated its internal compliance manual to capture organisational changes arising from the 2019 restructure and to reflect learnings arising from breaches identified in late 2019 and early 2020.  In December 2020 JEN initiated a review of its internal compliance manual as a result of a pending organisational restructure. This review will capture changes in roles   | Finalised<br>Manual (version<br>3) expected<br>end-April 2021. |
|                                  | arising from the restructure, compliance lessons learnt during 2020 and updated processes relating to the Physical and IT access control framework implemented in February 2021.   |  |
| Staff sharing                    | Staff sharing  | In-flight.   |
| register                         | During 2020, the staff sharing register was updated and published in February and May to reflect changes made as part of an organisational restructure.  | Updated register to be   |
|                                  | In December 2020, Jemena's HR team, (as part of their organisational change monitoring controls) advised the Regulatory Compliance Manager that a restructure would be occurring in April 2021. The Regulatory Compliance Manager has worked with HR to ensure compliance is maintained and to meet its obligations to maintain the published staff sharing register. The restructure will be completed by May 2021 at which time an updated register will be published. | published May<br>2021.   |
