Dear Sir,

Re application by Murray Link for regulatory status.

This submission is made in favour of Murray Link Struor. Companies. Application to the A.C.C. for conversion to a prescriptive service and max. allowance review for 2003 to 2013.

My view is that the lines must go underground even if there are higher costs. The underground version would have less maintenance costs, the visual aspect would be nil, less health problems and it would effect land valuation on a lesser scale.

Yours sincerely,
 J. Lowe
