

AER Confidentiality Template						
Title, page and paragraph number of document containing confidential information.	Description of the confidential information	Topic the confidential information relates to (e.g. capex, opex, WACC etc.)	Identify the recognised confidentiality category that the information falls within.	Provide a brief explanation of why the information falls into the selected category. If information falls within 'other' please provide further details on why the information should be treated as confidential.	Specify reasons supporting how and why detriment may be caused from disclosing the identified information.	Provide any reasons supporting why the identified detriment is not outweighed by the public benefit (especially public benefits such as the effect on the long term interests of consumers).
Appendix 5.09 - Asset Management Plan, Volume 1, p2	Staff names	Capex	Personal information	Information identifies specific employees	Employees may be directly and improperly approached by external parties	This is no public benefit in disclosure of this information as the names of the employees are not relevant.
Appendix 5.09 - Asset Management Plan, Volume 1, p12	Information relating to future land and easement requirements	Capex	Strategic information	Discusses alternative network redevelopment options that have differing land and easement requirements which impact differing sections of the community	Publishing the information could result in local community action to pursue options that benefit that community at the expense of consumers more generally	Publishing this information could increase costs and therefore prices for consumers generally.
Appendix 5.09 - Asset Management Plan, Volume 2, p1	Staff names	Capex	Personal information	Information identifies specific employees	Employees may be directly and improperly approached by external parties	This is no public benefit in disclosure of this information as the names of the employees are not relevant.
Appendix 5.10 - Asset Management Plan, Volume 2, p12, p27, p32	Information relating to future land and easement requirements	Capex	Strategic information	Discusses alternative network redevelopment options that have differing land and easement requirements which impact differing sections of the community	Publishing the information could result in local community action to pursue options that benefit that community at the expense of consumers more generally	Publishing this information could increase costs and therefore prices for consumers generally.
Appendix 5.12 - Contingent Projects, p.21	Information relating to customers operational and/or investment decisions	Capex - contingent projects	Market intelligence Personal information Other	The information relates to customers plausible future demand for electricity services, but is not yet confirmed. Information provided under rule 5.3 of the NER is confidential	The information could affect prices in the NEM to the detriment of consumers The information could cause concern for the customers staff and consequent detriment to the customers operations. Powerlink would be in breach of clause 5.3.8 of the Rules if the information is disclosed.	The information is provided in further support of a contingent project trigger and does not affect the ex-ante capital expenditure forecast. If the contingent project trigger occurs all relevant information will be put into the public domain through the RIT-T consultation process.
Replacement capex (repex) Model - Forecast Model - 2015 Profile; Asset Data sheet, Column F (Unit Cost), Transmission towers and substation switchgear	Cost related information	Capex	Market sensitive cost inputs	The cost information may affect Powerlink's ability to secure competitive price outcomes in future procurement activities.	The information would be interpreted by potential suppliers as an indication of Powerlink's willingness to pay for the provision of equipment and services.	Publication of forecast unit costs will compromise Powerlink's ability to deliver projects at the lowest possible costs which is against consumers interests.
Asset Management Plan (AMP), Volume 3 (Area Plans), p1	Staff names	Capex	Personal information	Information identifies specific employees	Employees may be directly and improperly approached by external parties	This is no public benefit in disclosure of this information as the names of the employees are not relevant.
AMP, Volume 3, p8, p47, p62, p83, p149	Network diagram	Capex	Information affecting security of the network	The information identifies specific infrastructure in publicly accessible places	The information could be used by individuals / groups looking to disrupt electricity supplies.	Powerlink's network is designated as critical national infrastructure by the Commonwealth Attorney Generals Department. There is no public benefit from compromising security of the network.
AMP, Volume 3, p13, p16, p36, p133, p146	Customer connection information	Capex	Other - customer connection information	Information provided under rule 5.3 of the NER is confidential	Powerlink would be in breach of clause 5.3.8 of the Rules if the information is disclosed.	It is not in the public interest for Powerlink to be seen to breach the Rules.
AMP Volume 3, p17, p20-22, p24, p175	Information relating to future land and easement requirements	Capex	Strategic information	Discusses alternative network redevelopment options that have differing land and easement requirements which impact differing sections of the community	Publishing the information could result in local community action to pursue options that benefit that community at the expense of consumers more generally	Publishing this information could increase costs and therefore prices for consumers generally.
AMP, Volume 3, p18	Customers asset information	Capex	Other - customer connection information	The information is proprietary to the customer and reflects their own strategic planning thinking. It has been provided to Powerlink to inform Powerlink's own asset planning.	The information discusses possible options for the customers assets that are not yet finalised. Premature publication may impact the customers ability to fulfill their plans.	The information is contextual in nature and does not affect the outcomes of Powerlink's area planning. There is no public benefit in disclosure of this information.
AMP Volume 3, p19, p174	Location of communications infrastructure	Capex	Information affecting security of the network	The information identifies specific infrastructure in publicly accessible places	The information could be used by individuals / groups looking to disrupt electricity supplies.	Powerlink's network is designated as critical national infrastructure by the Commonwealth Attorney Generals Department. There is no public benefit from compromising security of the network.
AMP, Volume 3, p29, p89, p129	Asset information	Capex	Information affecting security of the network	The information identifies specific asset information that could affect security of supply	The information could be used by individuals / groups looking to disrupt electricity supplies.	Powerlink's network is designated as critical national infrastructure by the Commonwealth Attorney Generals Department. There is no public benefit from compromising security of the network.
AMP, Volume 3, p37, p40, p156-158, p171, p173	Network information under certain conditions	Capex	Information affecting security of the network	The information identifies specific asset information that could affect security of supply	The information could be used by individuals / groups looking to disrupt electricity supplies.	Powerlink's network is designated as critical national infrastructure by the Commonwealth Attorney Generals Department. There is no public benefit from compromising security of the network.
RIN Template 5.4, Table 5.4.1	Maximum demand information for individual customers  Coincident and non-coincident MW and MVA forecasts under 10% PoE and 50% PoE conditions	Demand	Personal information Other	Forecast demand information reveals information on the planned future state of the internal business workings of the individual user.  It can reveal information about that user to the users' competitors that isn't otherwise available in the public domain.	An industrial users' competitors can use forecast demand information to discern information on the users production plan, throughput, efficiency etc. This information is personal and other information that could harm the users' position in the markets in which they compete.	Individual consumers should be entitled to have their consumptions forecasts remain private. They are entitled to reveal them, at their choice, if they see it as being to their advantage – e.g. seeking competitively priced electricity services.  It should not automatically be revealed as part of a regulatory process.
Appendix 7.01 Cost estimating methodology, data tables p.5 and 6	Cost related information	Cost estimates	Market sensitive cost inputs	The cost information may affect Powerlink's ability to secure competitive price outcomes in future procurement activities.	The information would be interpreted by potential suppliers as an indication of Powerlink's willingness to pay for the provision of equipment and services.	Publication of forecast unit costs will compromise Powerlink's ability to deliver projects at the lowest possible costs which is against consumers interests.
Self Insurance Cost Projections - Pages 7,12,17,18,20-22,26,29-32	Details of insurance arrangements including deductible, limits of cover premiums and specific loss events	details of insurance arrangements (Opex)	Market Sensitive Cost Inputs	Information would provide details of insurance cover that could provide entities with information that would adversely impact Powerlink's ability to negotiate competitive prices	Valuable information that, if released, could affect Powerlink's ability to obtain competitive prices in the Market Place	Publication of forecast insurance information will compromise Powerlink's ability to deliver the lowest possible cost which is against consumers interests.
Appendix 6.02 Finity Consulting Insurance Premium Projections 2017/18-2021-22, p4, pp10-25	Details of insurance arrangements including deductible, limits of cover premiums and specific loss events	details of insurance arrangements (Opex)	Market Sensitive Cost Inputs	Information would provide details of insurance cover that could provide entities with information that would adversely impact Powerlink's ability to negotiate competitive prices	Valuable information that, if released, could affect Powerlink's ability to obtain competitive prices in the Market Place	Publication of forecast insurance information will compromise Powerlink's ability to deliver the lowest possible cost which is against consumers interests.
Nominated Pass Through Events 2017/18 -2021/22 - Pages 8,12	Details of insurance arrangements including deductible, limits of cover premiums and specific loss events	details of insurance arrangements (Opex)	Market Sensitive Cost Inputs	Information would provide details of insurance cover that could provide entities with information that would adversely impact Powerlink's ability to negotiate competitive prices	Valuable information that, if released, could affect Powerlink's ability to obtain competitive prices in the Market Place	Publication of forecast insurance information will compromise Powerlink's ability to deliver the lowest possible cost which is against consumers interests.

Title, page and paragraph number of document containing confidential information.	Description of the confidential information	Topic the confidential information relates to (e.g. capex, opex, WACC etc.)	Identify the recognised confidentiality category that the information falls within.	Provide a brief explanation of why the information falls into the selected category. If information falls within 'other' please provide further details on why the information should be treated as confidential.	Specify reasons supporting how and why detriment may be caused from disclosing the identified information.	Provide any reasons supporting why the identified detriment is not outweighed by the public benefit (especially public benefits such as the effect on the long term interests of consumers).
Appendix 9.01 Letter to AER re: Nominated Periods – Return on Debt, tables						
Attachment 1 CONFIDENTIAL – Information on Powerlink Network to Appendix 15.03 NCIPAP	List of Transmission Circuit and Injection Points on Powerlink Network containing every transmission circuit and injection point on Powerlink network.	STPIS NCC	Information affecting the security of the network.	The information identifies specific infrastructure in publicly accessible places and detail of Powerlink's network and customers' plant and configuration.	The information could be used by individuals / groups looking to disrupt electricity supplies.	Powerlink's network is designated as critical national infrastructure by the Commonwealth Attorney Generals Department. There is no public benefit from compromising security of the network.
RIN Attachment CONFIDENTIAL - STPIS NCC Network Limits Information to Reset RIN - Compliance Checklist	Network limits information including single line diagrams showing substation, transmission lines and other assets, including customers' plant and configuration. In response to the Reset RIN Schedule 15.3 (b).	STPIS NCC	Information affecting the security of the network.	The information identifies specific infrastructure in publicly accessible places and detail of Powerlink's network and customers' plant and configuration.	The information could be used by individuals / groups looking to disrupt electricity supplies.	Powerlink's network is designated as critical national infrastructure by the Commonwealth Attorney Generals Department. There is no public benefit from compromising security of the network.
Project Pack CP.01151 Calvale Secondary Systems Replacement - Investment Options Paper: Cover Page, p6	Staff names and signatures	Capex	Personal information	Information identifies specific employees and includes their signatures	Employees may be directly and improperly approached by external parties. There is a risk of identify theft.	This is no public benefit in disclosure of this information as the names of the employees are not relevant.
Project Pack CP.01151 Calvale Secondary Systems Replacement - Investment Options Paper: p1	Network diagram	Capex	Information affecting security of the network	The information identifies specific infrastructure in publicly accessible places	The information could be used by individuals / groups looking to disrupt electricity supplies.	Powerlink's network is designated as critical national infrastructure by the Commonwealth Attorney Generals Department. There is no public benefit from compromising security of the network.
Project Pack CP.01151 Calvale Secondary Systems Replacement - Investment Options Paper: p2	Single line diagram	Capex	Information affecting the security of the network.	The information identifies specific circuit switching arrangements	The information could be used by individuals / groups looking to disrupt electricity supplies.	Powerlink's network is designated as critical national infrastructure by the Commonwealth Attorney Generals Department. There is no public benefit from compromising security of the network.
Project Pack CP.01151 Calvale Secondary Systems Replacement - Investment Options Paper: pp13-17	Network information under certain conditions	Capex	Information affecting security of the network	The information identifies specific asset information that could affect security of supply	The information could be used by individuals / groups looking to disrupt electricity supplies.	Powerlink's network is designated as critical national infrastructure by the Commonwealth Attorney Generals Department. There is no public benefit from compromising security of the network.
Project Pack CP.01151 Calvale Secondary Systems Replacement - Capital Project Endorsement Sheet	Staff names and signatures	Capex	Personal information	Information identifies specific employees and includes their signatures	Employees may be directly and improperly approached by external parties. There is a risk of identify theft.	This is no public benefit in disclosure of this information as the names of the employees are not relevant.
Project Pack CP.01151 Calvale Secondary Systems Replacement - Business Case: p1	Staff names	Capex	Personal information	Information identifies specific employees.	Employees may be directly and improperly approached by external parties.	This is no public benefit in disclosure of this information as the names of the employees are not relevant.
Project Pack CP.01151 Calvale Secondary Systems Replacement - Business Case: p3, p7, p9, p11	Customer and cost information	Capex	Market intelligence	The information describes non-regulated investments and arrangements with non-regulated customers.	The information could provide an advantage to Powerlink's competitors for non-regulated activities.	There is no benefit to consumers of regulated services from information regarding non-regulated services.
Project Pack CP.01151 Calvale Secondary Systems Replacement - Business Case: p8	Cost related information	Capex	Market sensitive cost inputs	The cost information may affect Powerlink's ability to secure competitive price outcomes in future procurement activities.	The information would be interpreted by potential suppliers as an indication of Powerlink's willingness to pay for the provision of equipment and services.	Publication of forecast unit costs will compromise Powerlink's ability to deliver projects at the lowest possible costs which is against consumers interests.
Project Pack CP.01647 Biloela to Moura 132kV Transmission Line Replacement - Project Proposal: p3, section 2.1; p4, Figure 1, section 2.1.1, p5, section 2.4, p8, section 3.1	Information relating to future land and easement requirements	Capex	Strategic information	Discusses alternative network redevelopment options that have differing land and easement requirements which impact differing sections of the community	Publishing the information could result in local community action to pursue options that benefit that community at the expense of consumers more generally	Publishing this information could increase costs and therefore prices for consumers generally.
Project Pack CP.01647 Biloela to Moura 132kV Transmission Line Replacement - Project Proposal: p12, Section 5.1	Cost related information	Capex	Market sensitive cost inputs	The cost information may affect Powerlink's ability to secure competitive price outcomes in future procurement activities.	The information would be interpreted by potential suppliers as an indication of Powerlink's willingness to pay for the provision of equipment and services.	Publication of forecast unit costs will compromise Powerlink's ability to deliver projects at the lowest possible costs which is against consumers interests.
Project Pack CP.01649 Callide A to Biloela 132kV Transmission Line Replacement - Project Proposal: p3, section 1, section 2.1.1; p4, Figure 1, section 2.2; p6, section 2.3; p7, section 3.1.	Information relating to future land and easement requirements	Capex	Strategic information	Discusses alternative network redevelopment options that have differing land and easement requirements which impact differing sections of the community	Publishing the information could result in local community action to pursue options that benefit that community at the expense of consumers more generally	Publishing this information could increase costs and therefore prices for consumers generally.
Project Pack CP.01649 Callide A to Biloela 132kV Transmission Line Replacement - Project Proposal: p11, section 5.1.	Cost related information	Capex	Market sensitive cost inputs	The cost information may affect Powerlink's ability to secure competitive price outcomes in future procurement activities.	The information would be interpreted by potential suppliers as an indication of Powerlink's willingness to pay for the provision of equipment and services.	Publication of forecast unit costs will compromise Powerlink's ability to deliver projects at the lowest possible costs which is against consumers interests.
Project Pack CP.01666 Dysart Substation Replacement - Project Proposal: p10, section 5.1	Cost related information	Capex	Market sensitive cost inputs	The cost information may affect Powerlink's ability to secure competitive price outcomes in future procurement activities.	The information would be interpreted by potential suppliers as an indication of Powerlink's willingness to pay for the provision of equipment and services.	Publication of forecast unit costs will compromise Powerlink's ability to deliver projects at the lowest possible costs which is against consumers interests.
Project Pack CP.01679 Mudgeeraba 110kV Primary and Secondary Systems Replacement - Investment Options Paper (Secondary Systems): p1, p14	Staff names	Capex	Personal information	Information identifies specific employees.	Employees may be directly and improperly approached by external parties.	This is no public benefit in disclosure of this information as the names of the employees are not relevant.
Project Pack CP.01679 Mudgeeraba 110kV Primary and Secondary Systems Replacement - Investment Options Paper (Secondary Systems): p3	Single line diagram	Capex	Information affecting the security of the network.	The information identifies specific circuit switching arrangements	The information could be used by individuals / groups looking to disrupt electricity supplies.	Powerlink's network is designated as critical national infrastructure by the Commonwealth Attorney Generals Department. There is no public benefit from compromising security of the network.
Project Pack CP.01679 Mudgeeraba 110kV Primary and Secondary Systems Replacement - Investment Options Paper (Secondary Systems): pp10-11	Network information under certain conditions	Capex	Information affecting security of the network	The information identifies specific asset information that could affect security of supply	The information could be used by individuals / groups looking to disrupt electricity supplies.	Powerlink's network is designated as critical national infrastructure by the Commonwealth Attorney Generals Department. There is no public benefit from compromising security of the network.
Project Pack CP.01679 Mudgeeraba 110kV Primary and Secondary Systems Replacement - Investment Options Paper (110kV Switchyard): p1, p15	Staff names	Capex	Personal information	Information identifies specific employees.	Employees may be directly and improperly approached by external parties.	This is no public benefit in disclosure of this information as the names of the employees are not relevant.

Title, page and paragraph number of document containing confidential information.	Description of the confidential information	Topic the confidential information relates to (e.g. capex, opex, WACC etc.)	Identify the recognised confidentiality category that the information falls within.	Provide a brief explanation of why the information falls into the selected category. If information falls within 'other' please provide further details on why the information should be treated as confidential.	Specify reasons supporting how and why detriment may be caused from disclosing the identified information.	Provide any reasons supporting why the identified detriment is not outweighed by the public benefit (especially public benefits such as the effect on the long term interests of consumers).
Project Pack CP.01679 Mudgeeraba 110kV Primary and Secondary Systems Replacement - Investment Options Paper (110kV Switchyard): pp3-4	Single line diagram	Capex	Information affecting the security of the network.	The information identifies specific circuit switching arrangements	The information could be used by individuals / groups looking to disrupt electricity supplies.	Powerlink's network is designated as critical national infrastructure by the Commonwealth Attorney Generals Department. There is no public benefit from compromising security of the network.
Project Pack CP.01679 Mudgeeraba 110kV Primary and Secondary Systems Replacement - Investment Options Paper (110kV Switchyard): p7	Customers asset information	Capex	Other - customer connection information	The information is proprietary to the customer and reflects their own strategic planning thinking. It has been provided to Powerlink to inform Powerlink's own asset planning.	The information discusses possible options for the customers assets that are not yet finalised. Premature publication may impact the customers ability to fulfill their plans.	The information is contextual in nature and does not affect the outcomes of Powerlink's area planning. There is no public benefit in disclosure of this information.
Project Pack CP.01679 Mudgeeraba 110kV Primary and Secondary Systems Replacement - Investment Options Paper (110kV Switchyard): p8	Manufacturer information	Capex	Market sensitive cost inputs	The name of the manufacturer is considered sensitive and confidential	Provision of this information could compromise future procurement activities	Only the manufacturers name has been removed and does impact on the significance of the information provided. There is no public benefit in this information but may impact Powerlink's future dealings with the manufacturer.
Project Pack CP.01679 Mudgeeraba 110kV Primary and Secondary Systems Replacement - Investment Options Paper (110kV Switchyard): p17	Network information under certain conditions	Capex	Information affecting security of the network	The information identifies specific asset information that could affect security of supply	The information could be used by individuals / groups looking to disrupt electricity supplies.	Powerlink's network is designated as critical national infrastructure by the Commonwealth Attorney Generals Department. There is no public benefit from compromising security of the network.
Project Pack CP.01679 Mudgeeraba 110kV Primary and Secondary Systems Replacement - Capital Project Endorsement Sheet	Staff names and signatures	Capex	Personal information	Information identifies specific employees and includes their signatures	Employees may be directly and improperly approached by external parties. There is a risk of identify theft.	This is no public benefit in disclosure of this information as the names of the employees are not relevant.
Project Pack CP.01679 Mudgeeraba 110kV Primary and Secondary Systems Replacement - Business Case: p1	Staff names	Capex	Personal information	Information identifies specific employees.	Employees may be directly and improperly approached by external parties.	This is no public benefit in disclosure of this information as the names of the employees are not relevant.
Project Pack CP.01679 Mudgeeraba 110kV Primary and Secondary Systems Replacement - Business Case: p11	Cost related information	Capex	Market sensitive cost inputs	The cost information may affect Powerlink's ability to secure competitive price outcomes in future procurement activities.	The information would be interpreted by potential suppliers as an indication of Powerlink's willingness to pay for the provision of equipment and services.	Publication of forecast unit costs will compromise Powerlink's ability to deliver projects at the lowest possible costs which is against consumers interests.
Project Pack CP.01710 Gin Gin Substation Rebuild - Project Proposal: p6.	Single line diagram	Capex	Information affecting the security of the network.	The information identifies specific circuit switching arrangements	The information could be used by individuals / groups looking to disrupt electricity supplies.	Powerlink's network is designated as critical national infrastructure by the Commonwealth Attorney Generals Department. There is no public benefit from compromising security of the network.
Project Pack CP.01710 Gin Gin Substation Rebuild - Project Proposal: p12, section 5.1	Cost related information	Capex	Market sensitive cost inputs	The cost information may affect Powerlink's ability to secure competitive price outcomes in future procurement activities.	The information would be interpreted by potential suppliers as an indication of Powerlink's willingness to pay for the provision of equipment and services.	Publication of forecast unit costs will compromise Powerlink's ability to deliver projects at the lowest possible costs which is against consumers interests.
Project Pack CP.02269 DWDM Replacement - Project Proposal: p3-4, section 2.1; p4, section 2.2	Make / model of equipment / software	Capex	Information affecting the security of the network.	The information identifies specific makes / models or communications systems that could be targeted by hackers.	The information could be used by individuals / groups looking to disrupt electricity supplies.	Powerlink's network is designated as critical national infrastructure by the Commonwealth Attorney Generals Department. There is no public benefit from compromising security of the network.
Project Pack CP.02269 DWDM Replacement - Project Proposal: p8, section 5.1	Cost related information	Capex	Market sensitive cost inputs	The cost information may affect Powerlink's ability to secure competitive price outcomes in future procurement activities.	The information would be interpreted by potential suppliers as an indication of Powerlink's willingness to pay for the provision of equipment and services.	Publication of forecast unit costs will compromise Powerlink's ability to deliver projects at the lowest possible costs which is against consumers interests.
Project Pack CP.02296 PDH Mux Replacement - Project Proposal: p 6, sections 2.1 and 2.2.	Make / model of equipment / software	Capex	Information affecting the security of the network.	The information identifies specific makes / models or communications systems that could be targeted by hackers.	The information could be used by individuals / groups looking to disrupt electricity supplies.	Powerlink's network is designated as critical national infrastructure by the Commonwealth Attorney Generals Department. There is no public benefit from compromising security of the network.
Project Pack CP.02296 PDH Mux Replacement - Project Proposal: p10, section 5.1	Cost related information	Capex	Market sensitive cost inputs	The cost information may affect Powerlink's ability to secure competitive price outcomes in future procurement activities.	The information would be interpreted by potential suppliers as an indication of Powerlink's willingness to pay for the provision of equipment and services.	Publication of forecast unit costs will compromise Powerlink's ability to deliver projects at the lowest possible costs which is against consumers interests.
Project Pack CP.02304 Clare South to Strathmore / Collinsville Transmission Line Refit - Project Proposal: p7, Section 5.1	Cost related information	Capex	Market sensitive cost inputs	The cost information may affect Powerlink's ability to secure competitive price outcomes in future procurement activities.	The information would be interpreted by potential suppliers as an indication of Powerlink's willingness to pay for the provision of equipment and services.	Publication of forecast unit costs will compromise Powerlink's ability to deliver projects at the lowest possible costs which is against consumers interests.
Project Pack CP.02339 Kemmis No. 2 Transformer Replacement - Project Proposal: p4, Figure 1	Single line diagram	Capex	Information affecting the security of the network.	The information identifies specific circuit switching arrangements	The information could be used by individuals / groups looking to disrupt electricity supplies.	Powerlink's network is designated as critical national infrastructure by the Commonwealth Attorney Generals Department. There is no public benefit from compromising security of the network.
Project Pack CP.02339 Kemmis No. 2 Transformer Replacement - Project Proposal: p8, Section 5.1	Cost related information	Capex	Market sensitive cost inputs	The cost information may affect Powerlink's ability to secure competitive price outcomes in future procurement activities.	The information would be interpreted by potential suppliers as an indication of Powerlink's willingness to pay for the provision of equipment and services.	Publication of forecast unit costs will compromise Powerlink's ability to deliver projects at the lowest possible costs which is against consumers interests.
Project Pack CP.02339 Kemmis No. 2 Transformer Replacement - Condition Assessment: Cover Sheet	Staff names	Capex	Personal information	Information identifies specific employees and their titles	Employees may be directly and improperly approached by external parties	This is no public benefit in disclosure of this information as the names and titles of the employees are not relevant.
Project Pack CP.02339 Kemmis No. 2 Transformer Replacement - Condition Assessment: p2, pp 4 - 22.	Intellectual property	Capex	Market intelligence	The information sets out Powerlink's approach to analysing and interpreting transformer condition.	The information would benefit Powerlink's competitors in the market for the provision of asset management services.	A summary of the assessment and the conclusions to be drawn are publicly available. There is insufficient public benefit in revealing the details of Powerlink's assessment approach.
Project Pack CP.02350 Bouldercombe Primary Plant Replacement - Project Proposal: p5, Figure 1.	Single line diagram	Capex	Information affecting the security of the network.	The information identifies specific circuit switching arrangements	The information could be used by individuals / groups looking to disrupt electricity supplies.	Powerlink's network is designated as critical national infrastructure by the Commonwealth Attorney Generals Department. There is no public benefit from compromising security of the network.

Title, page and paragraph number of document containing confidential information.	Description of the confidential information	Topic the confidential information relates to (e.g. capex, opex, WACC etc.)	Identify the recognised confidentiality category that the information falls within.	Provide a brief explanation of why the information falls into the selected category. If information falls within 'other' please provide further details on why the information should be treated as confidential.	Specify reasons supporting how and why detriment may be caused from disclosing the identified information.	Provide any reasons supporting why the identified detriment is not outweighed by the public benefit (especially public benefits such as the effect on the long term interests of consumers).
Project Pack CP.02350 Bouldercombe Primary Plant Replacement - Project Proposal: p11, section 5.1.	Cost related information	Capex	Market sensitive cost inputs	The cost information may affect Powerlink's ability to secure competitive price outcomes in future procurement activities.	The information would be interpreted by potential suppliers as an indication of Powerlink's willingness to pay for the provision of equipment and services.	Publication of forecast unit costs will compromise Powerlink's ability to deliver projects at the lowest possible costs which is against consumers interests.
Project Pack CP.02355 Ashgrove West Substation Rebuild - Project Proposal: p8, section 5.1	Cost related information	Capex	Market sensitive cost inputs	The cost information may affect Powerlink's ability to secure competitive price outcomes in future procurement activities.	The information would be interpreted by potential suppliers as an indication of Powerlink's willingness to pay for the provision of equipment and services.	Publication of forecast unit costs will compromise Powerlink's ability to deliver projects at the lowest possible costs which is against consumers interests.
Project Pack CP.02356 Lilyvale Transformer Replacement - Project Proposal: p8, section 5.1	Cost related information	Capex	Market sensitive cost inputs	The cost information may affect Powerlink's ability to secure competitive price outcomes in future procurement activities.	The information would be interpreted by potential suppliers as an indication of Powerlink's willingness to pay for the provision of equipment and services.	Publication of forecast unit costs will compromise Powerlink's ability to deliver projects at the lowest possible costs which is against consumers interests.
Project Pack CP.02356 Lilyvale Transformer Replacement - Condition Assessment: Cover sheet	Staff names	Capex	Personal information	Information identifies specific employees and their titles	Employees may be directly and improperly approached by external parties	This is no public benefit in disclosure of this information as the names and titles of the employees are not relevant.
Project Pack CP.02356 Lilyvale Transformer Replacement - Condition Assessment: p2, pp7-37	Intellectual property	Capex	Market intelligence	The information sets out Powerlink's approach to analysing and interpreting transformer condition.	The information would benefit Powerlink's competitors in the market for the provision of asset management services.	A summary of the assessment and the conclusions to be drawn are publicly available. There is insufficient public benefit in revealing the details of Powerlink's assessment approach.
Project Pack CP.02364 EMS Replacement - EMS Program of Work Report	Intellectual property Cost related information IT security information	Capex	Information affecting the security of the network. Market sensitive cost inputs	The information includes technical details regarding Powerlink's existing EMS and pricing information for potential replacement systems.	Information as to the status, criticality, configuration, vendors, lifecycle or technical details of the EMS can provide potential attackers with information on how the network may be attacked and/or compromised. As a highly specialised technical system there is limited market vendors that can be targeted for its replacement, and these details may result in decreasing competition if made public.	Powerlink's network is designated as critical national infrastructure by the Commonwealth Attorney Generals Department. There is no public benefit from compromising security of the network. Publication of forecast unit costs will compromise Powerlink's ability to deliver projects at the lowest possible costs which is against consumers interests.
Project Pack CP.02369 Blackwater No. 1 & 2 Transformer Replacement - Project Proposal: p7, section 5.1	Cost related information	Capex	Market sensitive cost inputs	The cost information may affect Powerlink's ability to secure competitive price outcomes in future procurement activities.	The information would be interpreted by potential suppliers as an indication of Powerlink's willingness to pay for the provision of equipment and services.	Publication of forecast unit costs will compromise Powerlink's ability to deliver projects at the lowest possible costs which is against consumers interests.
Project Pack CP.02369 Blackwater No. 1 & 2 Transformer Replacement - Condition Assessment: Cover sheet	Staff names	Capex	Personal information	Information identifies specific employees and their titles	Employees may be directly and improperly approached by external parties	This is no public benefit in disclosure of this information as the names and titles of the employees are not relevant.
Project Pack CP.02369 Blackwater No. 1 & 2 Transformer Replacement - Condition Assessment: p2, pp5-40	Intellectual property	Capex	Market intelligence	The information sets out Powerlink's approach to analysing and interpreting transformer condition.	The information would benefit Powerlink's competitors in the market for the provision of asset management services.	A summary of the assessment and the conclusions to be drawn are publicly available. There is insufficient public benefit in revealing the details of Powerlink's assessment approach.
Project Pack CP.02371 Bouldercombe Transformer 1 & 2 Replacement - Project Proposal: p7, section 5.1	Cost related information	Capex	Market sensitive cost inputs	The cost information may affect Powerlink's ability to secure competitive price outcomes in future procurement activities.	The information would be interpreted by potential suppliers as an indication of Powerlink's willingness to pay for the provision of equipment and services.	Publication of forecast unit costs will compromise Powerlink's ability to deliver projects at the lowest possible costs which is against consumers interests.
Project Pack CP.02371 Bouldercombe Transformer 1 & 2 Replacement - Condition Assessment: Cover sheet	Staff names	Capex	Personal information	Information identifies specific employees and their titles	Employees may be directly and improperly approached by external parties	This is no public benefit in disclosure of this information as the names and titles of the employees are not relevant.
Project Pack CP.02371 Bouldercombe Transformer 1 & 2 Replacement - Condition Assessment: p2, pp6-45	Intellectual property	Capex	Market intelligence	The information sets out Powerlink's approach to analysing and interpreting transformer condition.	The information would benefit Powerlink's competitors in the market for the provision of asset management services.	A summary of the assessment and the conclusions to be drawn are publicly available. There is insufficient public benefit in revealing the details of Powerlink's assessment approach.
Project Pack CP.02415 Greenbank to Mudgeeraba Transmission Line Refit - Project Proposal: p9, section 5.1	Cost related information	Capex	Market sensitive cost inputs	The cost information may affect Powerlink's ability to secure competitive price outcomes in future procurement activities.	The information would be interpreted by potential suppliers as an indication of Powerlink's willingness to pay for the provision of equipment and services.	Publication of forecast unit costs will compromise Powerlink's ability to deliver projects at the lowest possible costs which is against consumers interests.
Project Pack CP.02462 Ingham South No. 1 & 2 Transformer Replacement - Project Proposal: p4, section 2.1.2	Single line diagram	Capex	Information affecting the security of the network.	The information identifies specific circuit switching arrangements	The information could be used by individuals / groups looking to disrupt electricity supplies.	Powerlink's network is designated as critical national infrastructure by the Commonwealth Attorney Generals Department. There is no public benefit from compromising security of the network.
Project Pack CP.02462 Ingham South No. 1 & 2 Transformer Replacement - Project Proposal: p9, section 5.1	Cost related information	Capex	Market sensitive cost inputs	The cost information may affect Powerlink's ability to secure competitive price outcomes in future procurement activities.	The information would be interpreted by potential suppliers as an indication of Powerlink's willingness to pay for the provision of equipment and services.	Publication of forecast unit costs will compromise Powerlink's ability to deliver projects at the lowest possible costs which is against consumers interests.
Project Pack CP.02462 Ingham South No. 1 & 2 Transformer Replacement - Condition Assessment: Cover sheet	Staff names	Capex	Personal information	Information identifies specific employees and their titles	Employees may be directly and improperly approached by external parties	This is no public benefit in disclosure of this information as the names and titles of the employees are not relevant.
Project Pack CP.02462 Ingham South No. 1 & 2 Transformer Replacement - Condition Assessment: p2, pp5-40	Intellectual property	Capex	Market intelligence	The information sets out Powerlink's approach to analysing and interpreting transformer condition.	The information would benefit Powerlink's competitors in the market for the provision of asset management services.	A summary of the assessment and the conclusions to be drawn are publicly available. There is insufficient public benefit in revealing the details of Powerlink's assessment approach.
Project Pack CP.02463 Dysart No. 1 & 2 Transformer Replacement - Project Proposal: p4, section 2.1.2	Single line diagram	Capex	Information affecting the security of the network.	The information identifies specific circuit switching arrangements	The information could be used by individuals / groups looking to disrupt electricity supplies.	Powerlink's network is designated as critical national infrastructure by the Commonwealth Attorney Generals Department. There is no public benefit from compromising security of the network.

Title, page and paragraph number of document containing confidential information.	Description of the confidential information	Topic the confidential information relates to (e.g. capex, opex, WACC etc.)	Identify the recognised confidentiality category that the information falls within.	Provide a brief explanation of why the information falls into the selected category. If information falls within 'other' please provide further details on why the information should be treated as confidential.	Specify reasons supporting how and why detriment may be caused from disclosing the identified information.	Provide any reasons supporting why the identified detriment is not outweighed by the public benefit (especially public benefits such as the effect on the long term interests of consumers).
Project Pack CP.02463 Dysart No. 1 & 2 Transformer Replacement - Project Proposal: p10, section 5.1	Cost related information	Capex	Market sensitive cost inputs	The cost information may affect Powerlink's ability to secure competitive price outcomes in future procurement activities.	The information would be interpreted by potential suppliers as an indication of Powerlink's willingness to pay for the provision of equipment and services.	Publication of forecast unit costs will compromise Powerlink's ability to deliver projects at the lowest possible costs which is against consumers interests.
Project Pack CP.02463 Dysart No. 1 & 2 Transformer Replacement - Condition Assessment: Cover sheet	Staff names	Capex	Personal information	Information identifies specific employees and their titles	Employees may be directly and improperly approached by external parties	This is no public benefit in disclosure of this information as the names and titles of the employees are not relevant.
Project Pack CP.02463 Dysart No. 1 & 2 Transformer Replacement - Condition Assessment: p2, pp5-27	Intellectual property	Capex	Market intelligence	The information sets out Powerlink's approach to analysing and interpreting transformer condition.	The information would benefit Powerlink's competitors in the market for the provision of asset management services.	A summary of the assessment and the conclusions to be drawn are publicly available. There is insufficient public benefit in revealing the details of Powerlink's assessment approach.
Project Pack CP.02507 Collinsville to proserpine Inland Section Transmission Line Refit - Capital Project Endorsement Sheet	Staff names and signatures	Capex	Personal information	Information identifies specific employees and includes their signatures	Employees may be directly and improperly approached by external parties. There is a risk of identify theft.	This is no public benefit in disclosure of this information as the names of the employees are not relevant.
Project Pack CP.02507 Collinsville to proserpine Inland Section Transmission Line Refit - Business Case: p1	Staff names	Capex	Personal information	Information identifies specific employees.	Employees may be directly and improperly approached by external parties.	This is no public benefit in disclosure of this information as the names of the employees are not relevant.
Project Pack CP.02507 Collinsville to proserpine Inland Section Transmission Line Refit - Business Case: p8	Network diagram	Capex	Information affecting security of the network	The information identifies specific infrastructure in publicly accessible places	The information could be used by individuals / groups looking to disrupt electricity supplies.	Powerlink's network is designated as critical national infrastructure by the Commonwealth Attorney Generals Department. There is no public benefit from compromising security of the network.
Project Pack CP.02507 Collinsville to proserpine Inland Section Transmission Line Refit - Business Case: p10	Cost related information	Capex	Market sensitive cost inputs	The cost information may affect Powerlink's ability to secure competitive price outcomes in future procurement activities.	The information would be interpreted by potential suppliers as an indication of Powerlink's willingness to pay for the provision of equipment and services.	Publication of forecast unit costs will compromise Powerlink's ability to deliver projects at the lowest possible costs which is against consumers interests.
Project Pack CP.02516 GarbuttTransformer Replacement - Project Proposal: p4, section 2.1.2	Single line diagram	Capex	Information affecting the security of the network.	The information identifies specific circuit switching arrangements	The information could be used by individuals / groups looking to disrupt electricity supplies.	Powerlink's network is designated as critical national infrastructure by the Commonwealth Attorney Generals Department. There is no public benefit from compromising security of the network.
Project Pack CP.02516 GarbuttTransformer Replacement - Project Proposal: p9, section 5.1	Cost related information	Capex	Market sensitive cost inputs	The cost information may affect Powerlink's ability to secure competitive price outcomes in future procurement activities.	The information would be interpreted by potential suppliers as an indication of Powerlink's willingness to pay for the provision of equipment and services.	Publication of forecast unit costs will compromise Powerlink's ability to deliver projects at the lowest possible costs which is against consumers interests.
Project Pack CP.02516 GarbuttTransformer Replacement - Condition Assessment: Cover sheet	Staff names	Capex	Personal information	Information identifies specific employees and their titles	Employees may be directly and improperly approached by external parties	This is no public benefit in disclosure of this information as the names and titles of the employees are not relevant.
Project Pack CP.02516 GarbuttTransformer Replacement - Condition Assessment: p2, pp5-30	Intellectual property	Capex	Market intelligence	The information sets out Powerlink's approach to analysing and interpreting transformer condition.	The information would benefit Powerlink's competitors in the market for the provision of asset management services.	A summary of the assessment and the conclusions to be drawn are publicly available. There is insufficient public benefit in revealing the details of Powerlink's assessment approach.
Project Pack CP.02532 Bergins Hill - Goodna - Belmont 275kV Transmission Line Refit - Project Proposal: p5, section 3.2	Maps and locations	Capex	Information affecting the security of the network.	The information identifies the location of transmission network assets	The information could be used by individuals / groups looking to disrupt electricity supplies.	Powerlink's network is designated as critical national infrastructure by the Commonwealth Attorney Generals Department. There is no public benefit from compromising security of the network.
Project Pack CP.02532 Bergins Hill - Goodna - Belmont 275kV Transmission Line Refit - Project Proposal: p9, section 5.1	Cost related information	Capex	Market sensitive cost inputs	The cost information may affect Powerlink's ability to secure competitive price outcomes in future procurement activities.	The information would be interpreted by potential suppliers as an indication of Powerlink's willingness to pay for the provision of equipment and services.	Publication of forecast unit costs will compromise Powerlink's ability to deliver projects at the lowest possible costs which is against consumers interests.
Project Pack CP.02553 Wide Area Network Deployment Stage 2 - Project Proposal: p4, section 2.1	Make / model of equipment / software	Capex	Information affecting the security of the network.	The information identifies specific makes / models or communications systems that could be targeted by hackers.	The information could be used by individuals / groups looking to disrupt electricity supplies.	Powerlink's network is designated as critical national infrastructure by the Commonwealth Attorney Generals Department. There is no public benefit from compromising security of the network.
Project Pack CP.02553 Wide Area Network Deployment Stage 2 - Project Proposal: p8, section 5.1	Cost related information	Capex	Market sensitive cost inputs	The cost information may affect Powerlink's ability to secure competitive price outcomes in future procurement activities.	The information would be interpreted by potential suppliers as an indication of Powerlink's willingness to pay for the provision of equipment and services.	Publication of forecast unit costs will compromise Powerlink's ability to deliver projects at the lowest possible costs which is against consumers interests.
Project Pack CP.02565 Karana Downs to South Pine Transmission Line Refit - Project Proposal: p 8, section 5.1	Cost related information	Capex	Market sensitive cost inputs	The cost information may affect Powerlink's ability to secure competitive price outcomes in future procurement activities.	The information would be interpreted by potential suppliers as an indication of Powerlink's willingness to pay for the provision of equipment and services.	Publication of forecast unit costs will compromise Powerlink's ability to deliver projects at the lowest possible costs which is against consumers interests.
Project Pack CP.02617 Kamerunga Substation Rebuild - Project Proposal: p9, section 5.1	Cost related information	Capex	Market sensitive cost inputs	The cost information may affect Powerlink's ability to secure competitive price outcomes in future procurement activities.	The information would be interpreted by potential suppliers as an indication of Powerlink's willingness to pay for the provision of equipment and services.	Publication of forecast unit costs will compromise Powerlink's ability to deliver projects at the lowest possible costs which is against consumers interests.
Asset Maintenance Policy; p1	Staff names	AM Framework	Personal information	Information identifies specific employees	Employees may be directly and improperly approached by external parties	This is no public benefit in disclosure of this information as the names of the employees are not relevant.
Asset Management Framework; p1	Staff names	AM Framework	Personal information	Information identifies specific employees	Employees may be directly and improperly approached by external parties	This is no public benefit in disclosure of this information as the names of the employees are not relevant.
Asset Management Strategy; p1	Staff names	AM Framework	Personal information	Information identifies specific employees	Employees may be directly and improperly approached by external parties	This is no public benefit in disclosure of this information as the names of the employees are not relevant.
Asset Refurbishment Policy; p1	Staff names	AM Framework	Personal information	Information identifies specific employees	Employees may be directly and improperly approached by external parties	This is no public benefit in disclosure of this information as the names of the employees are not relevant.
Asset Risk Management Framework; p1	Staff names	AM Framework	Personal information	Information identifies specific employees	Employees may be directly and improperly approached by external parties	This is no public benefit in disclosure of this information as the names of the employees are not relevant.
Digital Asset Management Framework; p1	Staff names	AM Framework	Personal information	Information identifies specific employees	Employees may be directly and improperly approached by external parties	This is no public benefit in disclosure of this information as the names of the employees are not relevant.

Title, page and paragraph number of document containing confidential information.	Description of the confidential information	Topic the confidential information relates to (e.g. capex, opex, WACC etc.)	Identify the recognised confidentiality category that the information falls within.	Provide a brief explanation of why the information falls into the selected category. If information falls within 'other' please provide further details on why the information should be treated as confidential.	Specify reasons supporting how and why detriment may be caused from disclosing the identified information.	Provide any reasons supporting why the identified detriment is not outweighed by the public benefit (especially public benefits such as the effect on the long term interests of consumers).
Land Asset Methodology Framework; p1	Staff names	AM Framework	Personal information	Information identifies specific employees	Employees may be directly and improperly approached by external parties	This is no public benefit in disclosure of this information as the names of the employees are not relevant.
Physical Access to Assets Framework; p1	Staff names	AM Framework	Personal information	Information identifies specific employees	Employees may be directly and improperly approached by external parties	This is no public benefit in disclosure of this information as the names of the employees are not relevant.
Substation Asset Methodology - Framework; p1	Staff names	AM Framework	Personal information	Information identifies specific employees	Employees may be directly and improperly approached by external parties	This is no public benefit in disclosure of this information as the names of the employees are not relevant.
Appendix 7.04 Jacobs Cost Data Review to Support Repex Modelling, section 7 (pp36-43), section 8 (pp45-46), Appendix B (18 pages)	Cost related information	Cost estimates	Market sensitive cost inputs	The cost information may affect Powerlink's ability to secure competitive price outcomes in future procurement activities. In addition, parts of the information within this report remain the property of Jacobs and have been deemed confidential by Jacobs.	The information would be interpreted by potential suppliers as an indication of Powerlink's willingness to pay for the provision of equipment and services. Disclosure of parts of the report deemed confidential by Jacobs would be contrary to the conditions applied by Jacobs in providing this advice.	Publication of forecast unit costs will compromise Powerlink's ability to deliver projects at the lowest possible costs which is against consumers interests. Disclosure of parts of the report deemed confidential by Jacobs would be contrary to the conditions applied by Jacobs in providing this advice.
HV Underground Cable Asset Methodology - Framework; p1	Staff names	AM Framework	Personal information	Information identifies specific employees	Employees may be directly and improperly approached by external parties	This is no public benefit in disclosure of this information as the names of the employees are not relevant.
Transmission Line Asset Methodology - Framework; p1	Staff names	AM Framework	Personal information	Information identifies specific employees	Employees may be directly and improperly approached by external parties	This is no public benefit in disclosure of this information as the names of the employees are not relevant.
Project Approval Process for Regulated Network Capital Projects - Procedure; p1	Staff names	AM Framework	Personal information	Information identifies specific employees	Employees may be directly and improperly approached by external parties	This is no public benefit in disclosure of this information as the names of the employees are not relevant.
Joint Planning Framework; p1, p12	Staff names	Capex	Personal information	Information identifies specific employees	Employees may be directly and improperly approached by external parties	This is no public benefit in disclosure of this information as the names of the employees are not relevant.
Appendix 15.03 Network Capability Incentive Parameter Action Plan (NCIPAP) CONFIDENTIAL; p11-12	Network information under certain conditions, including line diagram showing substation, transmission line connections and customer plant configuration.	STPIS NCC	Information affecting security of the network	The information identifies specific network information that could affect security of supply	The information could be used by individuals / groups looking to disrupt electricity supplies.	Powerlink's network is designated as critical national infrastructure by the Commonwealth Attorney Generals Department. There is no public benefit from compromising security of the network.
RIN Template 2.10, Table 2.10.1	Negotiated and Unregulated operational expenditure	Opex	Market Intelligence	The information revealed underlying operational costs for negotiated and unregulated activities	The information could be used to establish related margins and may provide advantage to competitors for negotiated and unregulated activities	This is no public benefit in disclosure of this information. Publication of this information may impact Powerlink ability to obtain future negotiated and unregulated contracts.
RIN Template 2.10, Table 2.10.2	Negotiated and Unregulated operational expenditure	Opex	Market Intelligence	The information revealed underlying operational costs for negotiated and unregulated activities	The information could be used to establish related margins and may provide advantage to competitors for negotiated and unregulated activities	This is no public benefit in disclosure of this information. Publication of this information may impact Powerlink ability to obtain future negotiated and unregulated contracts.
RIN Template 2.15, Table 2.15.4	Details of insurance arrangements including deductible, limits of cover premiums and specific loss events	details of insurance arrangements (Opex)	Market Sensitive Cost Inputs	Information would provide details of insurance cover that could provide entities with information that would adversely impact Powerlink's ability to negotiate competitive prices	Valuable information that, if released, could affect Powerlink's ability to obtain competitive prices in the Market Place	Publication of forecast insurance information will compromise Powerlink's ability to deliver the lowest possible cost which is against consumers interests.
RIN Template 2.2, Table 2.2.1 Categories of transmission towers (rebuild and refit), substation switchbays, substation power transformers and OPGW	Cost related information	Capex	Market sensitive cost inputs	The cost information may affect Powerlink's ability to secure competitive price outcomes in future procurement activities.	The information would be interpreted by potential suppliers as an indication of Powerlink's willingness to pay for the provision of equipment and services.	Publication of forecast total costs, together with quantities of equipment allows a forecast unit rate to be derived. This will compromise Powerlink's ability to deliver projects at the lowest possible costs which is against consumers interests.
Appendix 16.02 Submissions to Powerlink's Transmission Pricing Consultation Paper, p6	Customer information	Pricing Methodology - Submissions to consultation	Other - customer connection information	It can reveal information about that user to the users' competitors that isn't otherwise available in the public domain.	The customer has requested that information on their transmission charges not be released publicly.	Individual consumers should be entitled to have their network charge information remain private.
RIN - Statutory Declaration	Personal information	Statutory Declaration	Personal information	Information identifies specific employees and personal information.	Employees may be directly and improperly approached by external parties	This is no public benefit in disclosure of this information as the names and personal details of the employees are not relevant.
Capex Model - Sheet RIN 2.2.1, columns D - J (part)	Cost related information	Capex	Market sensitive cost inputs	The cost information may affect Powerlink's ability to secure competitive price outcomes in future procurement activities.	The information would be interpreted by potential suppliers as an indication of Powerlink's willingness to pay for the provision of equipment and services.	Publication of forecast total costs, together with quantities of equipment allows a forecast unit rate to be derived. This will compromise Powerlink's ability to deliver projects at the lowest possible costs which is against consumers interests.
Appendix 5.11 Asset Planning Criteria, p1	Staff names	Capex	Personal information	Information identifies specific employees	Employees may be directly and improperly approached by external parties	This is no public benefit in disclosure of this information as the names of the employees are not relevant.
Reset RIN Non-coincident and MVA Maximum Demand Measures, p5	Customers asset information	Capex	Other - customer connection information	The information is proprietary to the customer and reflects their own internal asset management operation.	Customers internal operations are confidential to the customer. Publication may impact the customers position in their market.	The outworking of the information is reflected in the published formula. There is no public benefit in disclosure of this information.
Asset End of Life Policy	Staff names	Capex	Personal information	Information identifies specific employees	Employees may be directly and improperly approached by external parties	This is no public benefit in disclosure of this information as the names of the employees are not relevant.
Reset RIN Capex Template Population Calculation, Sheet 2.2 Repex Gross and Sheet 2.2 Repex Disaggregated	Cost related information	Capex	Market sensitive cost inputs	The cost information may affect Powerlink's ability to secure competitive price outcomes in future procurement activities.	The information would be interpreted by potential suppliers as an indication of Powerlink's willingness to pay for the provision of equipment and services.	Publication of forecast total costs, together with quantities of equipment allows a forecast unit rate to be derived. This will compromise Powerlink's ability to deliver projects at the lowest possible costs which is against consumers interests.
